English Learners in DC
(2019-20 and 2020-21 School Year Data)

Sept. 10, 2021
This landscape analysis provides available data for the 2019-20 and 2020-21 school years to help analyze programs for supporting the success of their English learner students.

• Vision for success and foundational principles
• Enrollment of students who are English learners (SY2019-20 and SY2020-21)
• English language proficiency levels (SY2019-20 only)
• Time to proficiency in DC (through SY2019-20)
• Graduation rate (SY2019-20)
• Certification of teachers to serve English learners (SY2019-20)

Note: Due COVID-19 shutdowns in spring 2020, state content assessment data are not available, and ACCESS test data represents only those tests that could be completed prior to distance learning.
OSSE’s vision for success for English learners

All EL students will have equitable, meaningful access to high-quality academic and linguistic programs in an inclusive, welcoming environment.

To put this vision into action, OSSE, LEAs, and schools will:

- Include EL students specifically as a valued part of their vision for the school and students' success.
- Provide high-quality education that equips ELs with the knowledge and skills necessary for language proficiency, grade-level content mastery, higher education, and career readiness.
- Continuously evaluate and improve programs for ELs in partnership with key stakeholders.
There is no one ‘profile’ for English learner students. Our students are diverse and unique.
Numerous factors affect each student’s experiences in different ways.

- Cultural
- Family
- Immigration
- Peer
- Linguistic
- Social and Emotional
- Academic
- Economic
Foundational Principles for Serving English Learners

Value the cultural and linguistic backgrounds of English learners (ELs).

Provide EL students access to grade-level academic content and English language instruction that are appropriate for advancing their language proficiency and academic achievement.

Partner with families, educators, system leaders, and communities to nurture EL students’ linguistic, academic, social, and emotional development.

Use multiple sources of data to inform and continually refine EL programs, services, instruction and assessment.
We are all responsible for the education of English learners.

English language supports and meaningful access to grade level content are English learner students’ civil rights.

• **Title VI of the Civil Rights Act of 1964**
• **Equal Educational Opportunities Act**

Under **Titles I and III of the Every Student Succeeds Act of 2013** states and schools are required by **federal law** and **state policy** to:

• Identify EL students
• Provide a sound, effective program for developing **proficiency in English**
• Ensure meaningful access to learning grade-level academic content.
English learners are a vital and growing group of students in DC with unique assets and needs.

The population of English learners has been growing steadily and comprised **12.5 percent (11,476)** of all DC students in the 2019-20 school year.

In the 2020-21 school year, the population of English learners dropped slightly to **11.9 percent (10,942)**.

**117 languages** are spoken by DC students. The top five languages are:

- Spanish
- Amharic
- French
- Chinese
- Russian
The decrease in the population of English learners from SY2019-20 to SY2020-21 was most evident in grades pre-K to 1 and in grade 9.
18 percent (16,476) of all DC students have had or currently have English learner status.

6 percent (4,972) of all DC students have exited from English learner status. Of these students, 2 percent have exited within the past four years.
English learners attend both public and public charter schools in DC, enrolling at DCPS schools at a higher rate than the overall student population.

DC offers both public and public charter school options.

All children in the United States have an equal right to enroll and participate in public elementary and secondary schools without regard to their or their parents’ or guardians’ immigration status or language background.

My School DC provides a common application and lottery process that makes it easier for families to take advantage of DC’s many school options.
Students who are English learners live in every ward in the District, with about 60 percent living and attending in Wards 1 and 4.
Most English learners enter DC schools in the early grades or ninth grade.

In the early grades, students’ initial proficiency ranges from newcomer to very proficient.

Most EL students who enter DC schools in the upper grades are starting as newcomers to English.
59 percent of ACCESS testing was completed in spring 2020 due to distance learning, thus limiting the full picture of English learners’ overall proficiency.
Overall, of the ACCESS tests completed, students show higher performances in listening and reading than speaking and writing.

This slide shows the domain scores for all domain tests that were completed, with missing tests at the top of the column in grey.
Overall, students with disabilities (SWD) who are also English learners tend to have lower ACCESS scores than English learners without disabilities.
The difference in English proficiency for dually-identified students is persistent across grade bands.
English learners with the most significant cognitive disabilities take Alternate ACCESS annually and demonstrate a range of performances across the alternate proficiency levels.
The target time to proficiency in DC is five years. In SY2019-20, one-third of English learners had been in English learner status for more than five years.

It takes students longer to reach the required exit score of a 5.0 composite on ACCESS 2.0 than on ACCESS 1.0, which means a higher share of EL students are now in EL status for more than five years.
Students have much lower rates achieving proficiency levels of 5.0 or higher on the 2.0 version of ACCESS, which started in SY2016-17.
Students who were English learners in high school had a much lower graduation rate than other students in SY2019-20.

The graduation rate for English learners in SY2019-20 was 8 percent lower than for English learners in SY2016-17.
The five-year graduation rate increases for English learners, but still shows disparity compared to students who were never English learners.
38 percent of teachers designated as English language development (ELD) teachers are certified in the field of ELD.
