Dear Parent or Guardian,
In spring 2023, your child took the Multi-State Alternate Assessment (MSAA) in English language arts (ELA)/literacy and mathematics. MSAA is a comprehensive assessment system designed to promote increasing higher academic outcomes for students with significant cognitive disabilities in preparation for a broader array of post-secondary outcomes.

MSAA in ELA/literacy and mathematics is required for students in grades $3-8$ and 11 who qualify for the alternate assessment. MSAA is primarily administered online, with built-in supports to help students respond independently. Depending on students' individual needs, some students interact directly with the computer while others interact with printed materials prepared by the test administrator.

The enclosed guide will walk you through the most important takeaways you can learn from your child's MSAA score report. It also provides you with resources to help your child improve in the coming year. If you haven't received your child's score reports, please contact the school that your child attended in the 2022-23 school year and ask for a copy.

We know that assessment scores do not tell your child's entire academic story. The results are one of several measures - including report card grades, classroom performance and teacher feedback - that together create the full picture of your child's progress in school. Within that picture, annual assessments are designed to help you and your child's teachers better understand the progress your child has made on the state content standards for ELA and math during the past year. Assessments also help us to better understand what resources schools need to support all learners.

Ultimately, our goal is to ensure that all students are prepared to be successful in school and pursue their dreams and aspirations. If you have general questions or want more information about the assessments, please visit our website at osse.dc.gov/service/alternate-assessments or have a discussion with your child's teacher. You can also use the resources on page 4 of this guide to gain a better understanding of the assessment and access sample items.

At the Office of the State Superintendent of Education (OSSE), we believe in the potential of all students, and know that all students can learn and achieve at high levels. We appreciate the opportunity to partner with you to help your child succeed.

Thank you,
Cresants
Dr. Christina Grant
DC State Superintendent of Education

## BREAKING DOWN THE SCORE REPORT: FRONT

This guide will walk you through the most important takeaways you can learn from your child's score report. It also provides you with helpful resources to help your child improve their performance in the coming year.

1) Performance Summary Your child's score falls into one of four performance levels. The performance levels identify if your child has met the expectations for the grade level. A score in Level 3 or 4 means your child has met or exceeded expectations in the subject. Students scoring below a Level 3 may still be developing grade-level skills and knowledge.
2) Performance Level Descriptors This section describes the knowledge and skills generally demonstrated by students performing around the same level as your child.

## BREAKING DOWN THE SCORE REPORT: BACK

3) Overview of the Assessment This section has background information on the MSAA and how it supports the needs of students who take it.

4) What skills can be worked on next? This section includes suggested skills for your child to work on next in each subject, based on their performance.

## RESOURCES AND SUPPORT

Below are several useful resources to help your child grow their performance, as well as useful tips for discussing the scores with your child and with your child's teacher.

Want to learn more about the MSAA?
Visit the following websites for more information on the MSAA:

- OSSE.dc.gov/service/alternate-assessments forstatewideassessmentresults
- msaastates.com for information on the assessmentand resources for families and educators
- msaaassessment.org/sample-items for sample items and scoring rubrics

Interested in talking to your child about their score?
Caregivers are the experts on talking to their children. Below are a few helpful things to remember when talking about your child's test score:

- Test scores are only one measure of performance.
- Focus on strengths.
- Discuss strategies for addressing areas of growth (e.g., online practice, working with a teacher).

Interested in talking to your child's teacher about their score?
Below are a few questions that can help guide a conversation with your child's teacher:

- What are my child's learning goals in math this year? In reading?
- How is my child performing in math class? In English language arts?
- What extra support in school and at home does my child need to meet these goals?
- Based on your observations, what does my child do well? What are some areas of growth for my child?
