

## DISTRICT OF COLUMBIA SCHOOL IMMUNIZATION POLICY

### Sample Immunization Communication Log and Timeline

DC law and regulation stipulate immunization notification requirements for schools. With respect to any student for whom a school does not have certification of immunization, the school shall notify the parent, guardian, or adult student immediately in writing that the student shall obtain and present certification of immunization. Schools are recommended to keep a record of all communications with parents, guardians and adult students regarding immunization certification non-compliance.

The School Health Team should begin communicating the school immunization policy in the spring of each school year during enrollment in order to give parents, guardians and adult students enough time to make an appointment to receive any missing immunizations prior to the next school year. The Office of the State Superintendent of Education (OSSE) has provided sample letters for communicating with all families and with non-compliant families. The sample letters and translated versions of the sample letters are available on the OSSE [website](#).
