1 July 1, 2017 – September 30, 2017
4 Short intakes can be completed via phone, email, referral, or walk-in. This includes all youth for whom we have completed the full intake process and those youth still undergoing the intake process.
5 The full intake includes an interview, which identifies barriers to enrollment and retention; a staff review of clients’ past academic history; and student completion of the ECASAS assessment to determine literacy and numeracy levels.
6 These youth have been enrolled for the first time since completing a full intake.
7 The “stick rate” captures the “impact” of the ReEngagement Center on students over time, at six and 12 months and is calculated once per quarter. The calculation is averaged across quarters using a weighted average, which controls for variation in the number of youth in each quarter’s “cohort.” The six month stick rate, for example, describes the fraction of youth who, six months after enrolling for the first time since coming to the ReEngagement Center, were still enrolled or had earned a credential. Youth are included in this calculation if their 180th day since being first enrolled occurs in the quarter during which the rate is calculated. This captures the “impact” of the ReEngagement Center on students over time, at six and 12 months. This calculation, referred to as the “stick rate,” is calculated once per quarter. The calculation is averaged across quarters using a weighted average, which controls for variation in the number of youth in each “cohort.”
8 “Active clients” are those clients who have a successful check in with their assigned ReEngagement Center Specialist at least once per month.
9 “Inactive clients” are those clients who: have invalid contact information, have refused services, have not made successful contact with their assigned ReEngagement Center Specialist in 90 days, have moved out of state, are incarcerated, deceased, or have earned a secondary credential.

<sup>15</sup> Oct. 20, 2014.
The following barriers have been identified by reengagement specialists among the 822 clients. The right-most column describes the fraction of needs met or services in progress among those who identified each barrier at intake or received a service (childcare, employment supports, public assistance, etc.) later. Youth can identify more than one barrier.

---

16 Rather than calculating the number of youth who report that transportation is a barrier based on their age at intake, this metric uses the client’s current age. Clients who are 22 or older are not eligible for the “Kids Ride Free” program.

17 Placement time is defined as the number of days between the full intake date and first education placement. A client’s placement time is attributed to the quarter the client was first placed, regardless of the quarter in which the client completed his or her full intake.
