June 23, 2023

Dear Students,

Welcome to Trinity Washington University! We are pleased to have you as a Dual Enrollment student for the Spring Semester of 2023-24. Our Dual Enrollment program provides academic rigor and it will help to ease the high school to college transition. Our Dual Enrollment classes count towards college credit.

Comparatively, there are several benefits in taking Dual Enrollment classes. Students that take Dual Enrollment classes: save money, they have more credits when they start college, and they may even finish college earlier than their peers. Research shows that students who participate in Dual Enrollment classes in high school had significantly higher cumulative grade point averages three years after high school graduation than their peers who did not participate in a Dual Enrollment program.

Given these points, we are prepared to provide all of our students with a thought-provoking and invigorating academic experience. We are confident that our students will be challenged and will be inclined to discover their strengths. If you have any questions or concerns please contact the Director of Dual Enrollment & Early Programs, Hope Witherspoon.

Sincerely,

Hope Witherspoon

GLBL 201 GLBL 201/1	8/28/2023 - 12/8/2023	2023 Fall Day	3.00	Section 1 Tu/Th 9:00 AM - 10:15 AM

Course Descriptions

ECON 100- Principles of Economics | Credits 3.000

Introduces the basic principles of economics to students with no prior economic training and provides foundational skills for Economics 101 and Economics 102. Prerequisites: successful completion of MATH 102, MATH 108, or MATH 109 is highly recommended

PSYC 101- Introductory Psychology | Credits 3.000

Introduces the student to the scientific study of the mind and behavior. All major sub-areas of psychology (social, developmental, clinical, physiological, motivation and emotion, sensation and perception) are explored, as well as the major theoretical perspectives (behavioral, cognitive, psychoanalytic, and humanistic).

SOCY 100- Introduction to Sociology | Credits 3.000

Introduces students to the science of sociology and prepares students for upper-level social science course work.

ENGL 107: College Composition | Credits 3.000

English 107 develops students' effective writing of evidence-based, thesis-centered academic essays. The course emphasizes development of the research and documentation skills necessary for successful academic writing. Students will primarily write argumentative essays, building to a substantive research paper. Students in the School of Professional Studies may not take this course pass/fail. Formerly ENG 107 College Composition. 3 credits Prerequisites for College of Arts and Sciences: None. Prerequisites for School of Professional Studies: ENGL 105 with a grade of C or better

OR score of 8 or higher on Writing portion of Accuplacer test. General Education: Foundational Skills Area FLC Area I Core Area I: Skills for Work and Life

COM 290 – Public Speaking | Credits 3.000

Examines theory and practice of public speaking. Students will prepare and present informative and persuasive speeches. Audience analysis, research, speech organization, delivery and effective persuasive strategies will be covered. 3 credits FLC Area I Core Area I: Skills for Work and Life

COM 150- Critical Reasoning & Oral Argumentation | Credits 3.000

The course is designed to improve the capacity for reasoning and to gain the strategies necessary for assessing the variances in messages in everyday interactions. The course also assists students to construct convincing arguments and critically evaluate the claims and premises in written and oral communication. The course fits into the larger first year curriculum by giving a set of methodological tools with which to critique complex arguments, assess the sufficiency and relevance of social scientific evidence, and prepare creative and well-reasoned arguments in a variety of written and oral communicative contexts.

MATH 109- Foundations of Mathematics | Credits 4.000

This quantitative literacy course is intended for social science and humanities majors. The course is designed to teach quantitative reasoning by emphasizing topics, both useful and relevant to a liberal-arts program, that enable students to become quantitatively literate. Topics include financial literacy, unit conversions, an introduction to linear and exponential functions and mathematical modeling, probability and statistics as well as math in politics.

GLBL 201 – Intro to Global Affairs | Credits 3.000

Introduces students to the interdisciplinary field of global affairs through a format that both imparts knowledge on compelling contemporary issues, and assists students to acquire and improve research, writing, and presentation skills that contribute to successful, upper-level coursework. Formerly INS 201 Introduction to International Affairs, INAF 201 Intro to International Affairs. General Education Curriculum: Civic Knowledge
