– Improve the skills, capacity, and well-being of the surrounding community residents
If schools work in partnership with parents and community members to help build resources and support for students and their families…

Increased academic success for District students is possible!
Given the theory of action, the following are results of a successful community school implementation:

- Children are ready to enter school;
- Students succeed academically;
- Students are actively involved in learning in their community;
- Students are healthy: physically, socially, and emotionally;
- Students live and learn in stable and supportive environments;
- Families are actively involved in children’s education; and
- Communities are desirable places to live.
