## OSSE Formula for Calculating Title I, Part A Allocations

The data needed for Title I, Part A allocations includes: (1) enrollment data from the most recent annual audit, (2) poverty data reported for the National School Lunch Program or reported by the DC Public Charter School Board, (3) projected enrollment increases for public charter schools that notified OSSE that they will open to serve students for the first time or significantly expand due to a significant event, (4) counts of students provided by the District of Columbia Public Schools for equitable services, and (5) the Title I, Part A allocations to all LEAs in the preceding year.

Four percent of the total state allocation from the U.S. Department of Education must be reserved for school improvement subgrants and activities (Section 1003(a) of the Elementary and Secondary Education Act of 1965 (ESEA)), except that such reservation shall not decrease the amount of funds each local educational agency receives below the amount received by the LEA for the preceding fiscal year (ESEA Section 1003(e)). Of this amount, 95 percent must be allocated to LEAs for school improvement activities in schools identified for improvement, corrective action, or restructuring (ESEA Section 1003(b)(1)).

The state may reserve the greater of \$400,000 or 1 percent of the total state allocation from the U.S. Department of Education to carry out administrative duties (ESEA Section 1004(a)), except that if the sum of the amounts appropriated for Title I, Parts A, C, and D for all states exceeds \$14 billion, the U.S. Department of Education will provide caps on administrative costs representing 1 percent of what the state would receive if only \$14 billion were allocated among all states for Title I, Parts A, C, and D (ESEA Section 1004(b)). The state may, as applicable, apply an approved indirect cost rate to the amount reserved for state administration.

For the purpose of carrying out an Academic Achievement Awards program authorized under ESEA Section 1117(b), the state may reserve, from the amount (if any) by which the state allocation from the U.S. Department of Education exceeds the allocation from the preceding fiscal year, up to 5 percent of the excess amount (ESEA Section 1117(c)(2)(A)).

"For any fiscal year, a public charter school shall be considered to be a local educational agency for purposes of part A of title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311 et seq.), and shall be eligible for assistance under such part, if the fraction the numerator of which is the number of low-income students enrolled in the public charter school during the fiscal year preceding the fiscal year for which the determination is made and the denominator of which is the total number of students enrolled in such public charter school for such preceding year, is equal to or greater than the lowest fraction determined for any District of Columbia public school receiving assistance under such part A where the numerator is the number of low-income students enrolled in such public school for such preceding year and the denominator is the total number of students enrolled in such public school for such preceding year" (Section 38-1802.10(a)(1)(A), DC School Reform Act of 1995).

"The term 'low-income student' means a student from a low-income family determined according to the measure adopted by the District of Columbia to carry out the provisions of part A of title I of the Elementary and Secondary Education Act of 1965 that is consistent with the measures described in § 1113(a)(5) of such Act (20 U.S.C. 6313(a)(5)) for the fiscal year for which the determination is made" (Section 28-1802.10(a)(1)(B), DC School Reform Act of 1995). The District of Columbia uses as its measure the number of children eligible for free and reduced-price lunches under the Richard B. Russell National School Lunch Act, except in cases in which an LEA does not participate in free and reduced-price lunch eligibility determination, when poverty data reported by the District of Columbia Public Charter School Board is used instead.

The percentage of students in an LEA who are low-income students is determined by dividing the reported K-12 poverty enrollment for the LEA by the audited K-12 enrollment. An LEA is eligible to receive Title I, Part A funding if the percentage of students in the LEA who are low-income students is equal to or greater than the percentage of students who are low-income students in the District of Columbia Public School that is the District of Columbia Public School with the lowest such percentage that is served with Title I funds.

For the District of Columbia Public Schools, the number of low-income DC resident students attending private schools is added to the total count of low-income students served by the LEA, as DCPS is responsible for fulfilling the equitable services provisions of Title I, Part A (ESEA Section 1120). DCPS must determine the number of low-income DC resident students according to one of the measures provided in the statute (ESEA Section 1120(c)).

The poverty counts for public charter school LEAs are, as applicable, adjusted for new and significantly expanding charter schools in accordance with OSSE policy. For significantly expanding public charter school LEAs, the reported, projected increase in K-12 enrollment is multiplied by the percentage of students in the LEA in the preceding year who were low-income students and the resulting count is added to the public charter school LEAs' poverty counts.

For each LEA, the reported K-12 poverty count, the projected increase in K-12 poverty enrollment due to opening or significant expansion, and the number of private school students generating Title I funds are added together to determine the total K-12 poverty count.

Based on the proportion of each LEA's K-12 poverty count to the total District of Columbia K-12 poverty count (i.e., the sum of all LEAs' K-12 poverty counts), an allocation is calculated for each LEA.

Each LEA's initially-determined allocation is then reduced proportionally to remove the 4 percent set-aside for school improvement. Multiple steps of automatic calculations follow in order to remove the full 4 percent set-aside while ensuring that such removal does not reduce any LEA's allocation below its allocation in the preceding year (ESEA Section 1003(e)).

Next, the full reservation for state administrative costs is removed from LEA allocations by reducing each LEA's allocation in proportion to each LEA's relative share of the total DC K-12 poverty count (ESEA Section 1004).

If applicable, the full reservation for the Academic Achievement Awards program is removed from LEA allocations by reducing each LEA's allocation in proportion to each LEA's relative share of the total DC K-12 poverty count (ESEA Section 1117(b)).

Finally, any other required adjustments are made to LEA allocations. Beginning with the calculation of Title I, Part A allocations for Federal Fiscal Year 2011, these additions or subtractions will include those made to adjust for new and significantly expanding public charter school LEAs based on actual enrollment and poverty data in cases where projections were used to calculate allocations in the preceding year and the projections did not match actual data later collected (ESEA Section 5206(b)).

## OSSE Formula for Calculating Title II, Part A Allocations

The data needed for Title II, Part A allocations includes: (1) enrollment data from the most recent annual audit, (2) poverty data reported for the National School Lunch Program or reported by the DC Public Charter School Board, (3) projected enrollment increases for public charter schools that notified OSSE that they will open to serve students for the first time or significantly expand due to a significant event, (4) counts of students provided by the District of Columbia Public Schools for equitable services, (5) the Title I, Part A allocations to all LEAs in the preceding year, (6) the Federal Fiscal Year 2001 allocations to the District of Columbia for the Eisenhower Professional Development and Class-Size Reduction grant programs, and (7) the most recent U.S. Census count of K-12 students in poverty for the District of Columbia.

The District of Columbia follows the steps outlined in Section D-5 of the *Improving Teacher Quality State Grants Non-Regulatory Guidance*, revised in October 2006, for calculating allocations to LEAs from Title II, Part A funds.

Two-and-a-half percent of the total state allocation must be reserved to make subgrants to eligible partnerships from the state agency for higher education (Section 2113(a)(2) of the Elementary and Secondary Education Act of 1965 (ESEA)).

Two-and-a-half percent of the total state allocation may be reserved for state activities (ESEA Section 2113(a)(3)).

Up to 1 percent of the state allocation may be used for state administrative costs (ESEA Section 2113(d)).

Part of the allocations to LEAs is determined based on a "hold harmless" amount that is made up of the sum of the Federal Fiscal Year 2001 allocation to the state from the Eisenhower Professional Development and the Class-Size Reduction grant programs (ESEA Section 2121(a)(2)). The remainder to be sub-granted to LEAs is considered "supplemental" and is based on total K-12 enrollment and K-12 poverty enrollment counts (ESEA Section 2121(a)(3)).

Part of the Title II, Part A allocation calculation requires the determination of a "state equating factor," equal to the U.S. Census count of children in poverty aged 5-17 divided by the number of poor children enrolled in schools operated by local educational agencies on the basis of the alternative poverty data used by the state (i.e., the number of students eligible for free and reduced-price lunch). A "census poverty estimate" is calculated for each LEA by multiplying the "state equating factor" by the K-12 poverty count for the LEA.

For each LEA, the audited K-12 enrollment, the projected increase in K-12 enrollment due to opening or significant expansion, and the total number of K-12 students in District of Columbia private schools are added together to determine the total K-12 enrollment count.

For each LEA, the reported K-12 poverty count, the projected increase in K-12 poverty enrollment due to opening or significant expansion, and the number of private school students in poverty are added together to determine the total K-12 poverty count.

50% of the Eisenhower portion of the hold harmless amount is allocated to LEAs based on their relative share of total K-12 enrollment. 50% of the Eisenhower portion of the hold harmless amount is allocated to LEAs based on their relative share of Title I, Part A allocations in the preceding year.

20% of the Class-Size Reduction portion of the hold harmless amount is allocated to LEAs based on their relative share of total K-12 enrollment. 80% of the Class-Size Reduction portion of the hold harmless amount is allocated to LEAs based on their relative share of the "census poverty estimate."

Of the funds remaining for allocation to LEAs separate from the hold harmless amount, 20% is allocated based on the relative shares of total K-12 enrollment and 80% is allocated based on the relative shares of the "census poverty estimate."

The sum of the Eisenhower hold harmless allocation, the Class-Size Reduction hold harmless allocation, and the allocation of additional funds is the total allocation to an LEA.

Finally, any other required adjustments are made to LEA allocations. Beginning with the calculation of Title II, Part A allocations for Federal Fiscal Year 2011, these additions or subtractions will include those made to adjust for new and significantly expanding public charter school LEAs based on actual enrollment and poverty data in cases where projections were used to calculate allocations in the preceding year and the projections did not match actual data later collected (ESEA Section 5206(b)).

## OSSE Formula for Calculating Title III, Part A Allocations

The data needed for Title III, Part A allocations includes: (1) enrollment data from the most recent annual audit, (2) projected enrollment increases for public charter schools that notified OSSE that they will open to serve students for the first time or significantly expand due to a significant event, and (3) counts of students provided by the District of Columbia Public Schools for equitable services.

Five percent of the total state allocation from the U.S. Department of Education may be reserved for state activities (Section 3111(b)(2) of the Elementary and Secondary Education Act of 1965 (ESEA)), including state administration.

The state may use the greater of 60% of the amount reserved for state activities or \$175,000 to carry out administrative duties (ESEA Section 3111(b)(3)). The state may, as applicable, apply an approved indirect cost rate to the amount reserved for state administration.

For the purpose of providing subgrants to LEAs that have experienced a significant increase in immigrant children and youth, the state must reserve up to 15 percent of the total state allocation from the U.S. Department of Education (ESEA Section 3114(d)).

For each LEA, the audited Limited English Proficient (LEP)/Non-English Proficient (NEP) enrollment, the projected increase in LEP/NEP enrollment due to opening or significant expansion, and the number of private school students generating Title III funds are added together to determine the total LEP/NEP count.

Based on the proportion of each LEA's LEP/NEP count to the total District of Columbia LEP/NEP count (i.e., the sum of all LEAs' LEP/NEP counts), an allocation is calculated for each LEA. These allocations are shared with LEAs for planning purposes.

No LEA may receive a Title III, Part A subgrant of less than \$10,000 (ESEA Section 3114(b)). LEAs with allocations of less than \$10,000, based on their total LEP/NEP count, may only access Title III funds by joining a consortium with other agencies.

Once the LEAs that will join a consortium are determined, the allocations are updated based on, excluding all LEAs that have allocations of less than \$10,000 and do not join a consortium, each LEA's relative share of LEP/NEP students.

If applicable, allocations to LEAs that have experienced a significant increase in immigrant children and youth are made from the reservation for such subgrants. Otherwise, the amount of funds reserved is re-allocated in the same way other Title III, Part A funds are allocated.

Finally, any other required adjustments are made to LEA allocations. Beginning with the calculation of Title III, Part A allocations for Federal Fiscal Year 2011, these additions or subtractions will include those made to adjust for new and significantly expanding public charter school LEAs based on actual enrollment and poverty data in cases where projections were used to calculate allocations in the preceding year and the projections did not match actual data later collected (ESEA Section 5206(b)).
