Central Directory of Early Intervention Resources

Strong Start
DC Early Intervention Program
Dear Resident,

Children are our most valuable resource. Early intervention services can make a world of difference in the lives of infants and toddlers who are suspected of having, or have been diagnosed with, developmental delays or disabilities and their families. The Strong Start DC Early Intervention Program, (Strong Start) serves as the initial point of contact in initiating those services.

Early intervention services capitalize on the developmental potential of infants and toddlers with disabilities within the perspective of their daily routines and activities, increasing their potential to live independently as mature adults. The earlier services are started, the more likely it is that the educational achievement and quality of life for children with disabilities will be higher.

The federal Individuals with Disabilities Education Act (IDEA), Part C along with the District of Columbia Public Law 1-2-119 mandate that infants and toddlers with disabilities and their families receive coordinated services in the natural environment. These services must be flexible, culturally responsive, and most importantly, meet the needs of the child and family.

The Strong Start Central Directory provides information about:

- Public and private early intervention services, resources, and experts
- Research and demonstration projects being conducted in the District;
- Professional and other groups that provide assistance to Part C eligible children and their families.
INTRODUCTION
In the District of Columbia, the Office of the State Superintendent of Education is the lead agency for the Part C early intervention system. The Division of Specialized Education’s Strong Start DC Early Intervention Program (Strong Start) serves as the single point of entry for infants and toddlers whose families have concerns about their development. Strong Start is charged with implementing the Infants and Toddlers Program under the Individuals with Disabilities Education Act (IDEA), Part C (34 CFR, Part 303). Under this Act, Strong Start is responsible for services to young children, birth to age three (3) years.

WHAT ARE EARLY INTERVENTION SERVICES?
Early intervention services are provided based on the developmental needs of the child, the concerns and priorities of the family, and the resources available to them. Services are provided within the context of the child and family’s daily activities and routines. Early intervention services include:

- assistive technology, including devices or services
- audiology or hearing services
- family training, counseling and home visits
- health services necessary for a child to benefit from other early intervention services
- medical services for diagnosis and evaluation
- nursing services
- nutrition services
- occupational therapy
- physical therapy
- psychological services
- service coordination (case management)
- social work services
- special instruction-cognitive therapy
- speech and language services
- vision services

WHO IS ELIGIBLE?
Children are eligible for early intervention services when they have a condition known to result in developmental delay (like Down Syndrome); or if they demonstrate a 50% developmental delay (are doing the things that children half their age are doing) in one (1) or more areas of development.

WHERE ARE SERVICES PROVIDED?
Services are provided in the child’s natural environment, or the location that the child spends most of his/her day. Children can receive their services in a variety of settings, including the home, licensed child care centers, or early intervention programs designed to serve children with delays.
WHO PAYS FOR SERVICES?
Some services must be provided at no cost to the family such as multidisciplinary evaluations and service coordination. Families utilize public and private insurance to pay for other services. Strong Start uses a sliding fee scale to determine a family’s ability to pay when financial assistance is requested.

EVALUATION TO DETERMINE ELIGIBILITY
Children under the age of three are eligible for Strong Start because they are either experiencing a significant developmental delay, or they have a diagnosed physical or mental condition with a high probability of resulting in a developmental delay. Strong Start does not serve infants and toddlers who are at risk of delay due to environmental causes but who are not actually experiencing a significant developmental delay. For children referred to Strong Start without a diagnosed condition, a multidisciplinary evaluation of all five areas of development, using a standardized instrument, will be conducted to determine eligibility.

WHO CAN REFER A CHILD TO STRONG START?
Strong Start is responsible for activities that promote the awareness of early intervention and helps to identify children who may need our services. This is called Child Find. Strong Start also accepts referrals from anyone who has concerns about a child’s development including parents, family members, friends, physicians, hospitals, child care staff, and social workers.

WHAT HAPPENS WHEN A CHILD IS REFERRED?
Strong Start will evaluate a child, with the parent or guardian’s permission, to determine how he/she is growing and if a delay is present. Strong Start must look at each child’s development in all areas including:

- Physical – how the child moves, uses hands, sees and hears
- Cognitive – how the child thinks and learns
- Communication – how the child understands language, makes beginning speech sounds, and uses speech
- Social/Emotional – how the child copes, interacts and gets along with others
- Adaptive – how the child does activities such as eating, drinking, dressing and toileting

If the child is eligible, a coordinated individualized family service plan (IFSP) will be developed with the family. This plan will address the family’s needs, identify what kinds of things the child needs to work on, and the services that will be put in place to support the child’s development.

WHAT SHOULD I DO TO MAKE A REFERRAL?
Referring a child is easy. Simply call the Strong Start Child Find phone line at (202) 727-3665. The Strong Start Referral form can also be downloaded online at http://osse.dc.gov/service/strong-start-dc-early-intervention-program-dc-eip-child-find and faxed to 202-724-7230 or emailed to osse.dceip@dc.gov.
Child and Family Services Agency (CFSA)

The Child and Family Services Agency (CFSA) is the District of Columbia public agency that protects child victims, and children at risk, of abuse or neglect. CFSA has four basic functions: (1) Child Protective Services (2) Supportive Family Services (3) Foster Care and (4) Permanence.

Department of Health

✓ Community Health Administration
The mission of the Community Health Administration is to improve health outcomes for targeted populations by promoting coordination within the health care system, by enhancing access to prevention, medical care and support services, and by fostering public participation in the design and implementation of programs for District of Columbia women, infants, children (including children with special health care needs) and other family members.

▪ Women, Infants and Children (WIC)
WIC is a federally funded nutrition program that provides to pregnant women and new mothers nutrition education, nutrient-rich supplemental food, health and social service referrals and immunization screening for children less than two years of age.

▪ Perinatal and Infant Health Bureau
The Perinatal and Infant Health Bureau is to reduce perinatal outcome disparities (including infant mortality, very low birth weight, and preterm births and to improve the preconception/inter-conception health of women and infants.
