### Blueprint Notes

- > Reporting Category percentages are identical to the 2012 targets.
- > To satisfy Range of Knowledge alignment criterion, at least 1 indicator from every standard should ideally be tested each year and every indicator should be tested within a three-year period. For 2013, an exceptions may be necessary for Grades 5, 8 and Biology due to item pool limitations.
- > For 2013, the number of EFT items per form is 12 MC, 2 CR (two forms).
- > CR items are each worth two points and are scored with item-specific rubrics/scoring guides.

### Anchor Items

- > Items will contribute to operational tests.
- > Items are distributed across all three sessions.
- > **NOTE:** Anchor set for Science should consist of 23 MC items. Items in the Anchor set will be distributed across Strands in proportion to the overall blueprint. Wherever possible, an item will not serve as an anchor more than two years in sequence.

### Embedded Field Test Items

- > EFT 24 MC, 4 CR across 2 forms.
- > Items are field tested to fill operational slots in future years.
- > A CR item will never be the last item of a session.
- > Total EFT items are distributed across strands based upon the current or projected future gaps in the
- > Item development plans are based upon the need to fill gaps in the RC percentages from OSSE's proposed blueprint for the rearticulated science standards (February 2010 version).
