Introduction

Purpose

This resource guide has been developed to provide teachers and other stakeholders with an understanding of the District of Columbia Comprehensive Assessment System (DC CAS). When used in conjunction with other curricular materials and texts, the guide will

- help teachers as they make decisions about targeted classroom instruction and assessment,
- provide a framework and focus of instruction aligned with the skills and processes measured by test items of the DC CAS, and
- enhance and strengthen instructional journeys.

Test Accountability

The tests of the DC CAS have been designed to measure the academic proficiency of students in the District of Columbia relative to their mastery of the DC Content Standards. These tests are aligned to the Science and Health and Physical Education standards of the District of Columbia. In addition to the DC Content Standards, the Common Core State Standards continue to be implemented in the 2013–2014 school year. In Spring 2014, the DC CAS Reading, Mathematics, and Composition tests will be aligned to the content in the Common Core State Standards. More information about the content standards measured by the DC CAS can be viewed

online at <http://osse.dc.gov/service/dc-educational-standards>.

The battery of tests of the DC CAS are administered in the spring of each school year.

DC CAS testing is scheduled to take place March 31–April 11, 2014.

Reading and mathematics tests are administered to students in grades 2–8 and 10, and reading is administered to students in grade 9. For grades 3–8 and 10, the tests have been operational since 2006. The reading tests for grade 9 have been operational since 2011, and since 2012 for the reading and mathematics tests for grade 2.

The testing of students' writing skills via the composition component of the DC CAS became operational in Spring 2008. Prior to that administration, a series of writing prompts were piloted in 2006 and 2007. New prompts aligned to the Common Core were piloted in Spring 2012. For the first time, the Spring 2013 composition test results were included in the DC Accountability Framework calculations.

In Spring 2007, science tests were administered to students in grades 5 and 8 as well as to students who were enrolled in their school's biology course. The science and biology tests were first operational in 2008, and student scores on these tests have been reported since that administration.

The Spring 2013 science and biology test results were not included in DC's Accountability Framework calculations; details about future inclusion into the Framework will be released by OSSE.

Test Format

In 2014, as in previous years, the tests for reading and mathematics will be combined into one test book for grades 2–8 and 10. For each tested grade, there will be two forms. Teachers should always confirm that each student has a corresponding test book and answer booklet.

Students in grade 9 will also be administered the reading test. There will be two forms.

For grades 2 and 3, the students write their answers in their scannable test books. Students in grades 4–10 record their answers in scannable answer booklets, color-coded by form and grade.

For grades 4, 7, and 10, the composition test will consist of a passage, a writing prompt that requires an analysis of the text, and lined pages for students to write their essay.

The science and biology tests will have two forms each, and both a test book and an answer booklet will be assigned to each student taking the test.

The health test will have one form for each tested grade. Students will be assigned a test book and an answer booklet.

Both selected-response (multiple-choice) and constructed-response items comprise the tests of the DC CAS. For a selected-response item, students choose the correct answer from among four answer choices. For a constructed-response item or composition writing prompt, students write a response to a test question. Student responses are then scored according to the criteria of rubrics or scoring guides. Rubrics and sample scoring guides can be found in the reading, composition, mathematics, and science/biology sections of this document.

Reporting Categories

The test items of the DC CAS measure the proficiency of students based on the DC Content Standards (science/biology and health) and the Common Core State Standards (reading, mathematics, and composition). These standards are grouped into reporting categories for the DC CAS. Strands from the DC Content Standards are generally used as the reporting categories. Each category is not equally weighted.

A description of the reporting categories and what each measures follows:

Reading

- **Vocabulary Acquisition and Use:** Items in this category measure students' ability to identify meanings of words using prior knowledge, word structure, etymology, a dictionary, and/or context.

- **Informational Text:** Items of this category measure students' ability to read, comprehend, and respond to informational passages. The passages used may be expository texts, literary nonfiction texts, documentary or procedural texts, or persuasive texts. Students may be asked to locate or interpret details, examine structure, identify main idea, or explain/evaluate key ideas of a given text.
- **Literary Text:** Items of this category measure students' ability to read, comprehend, and respond to literary passages. These passages may be short stories, poems, excerpts from larger works, or fables. Students may be asked about the literary elements or the style and language of the text. They may also be asked to explain or analyze the theme or the author's implicit purpose or audience.

Composition

Student writing is evaluated on three rubrics that include the following:

- **Topic Development:** clarity of focus, development of ideas, appropriate organization, and effective use of language.
- **Language Conventions:** sentence structure, grammar, and use of conventions.
- **Understanding Literary or Informational Text:** understanding of the complexities of text to

perform a literary analysis; demonstrate mastery of a dually aligned reading standard.

Each prompt will require students to demonstrate an ability to perform a literary analysis. Each prompt will be aligned to a specific text.

Grade 4: informational and literary texts.

Grade 7: informational, literary, and literary non-fiction texts.

Grade 10: informational, literary, and literary non-fiction texts.

Mathematics

- **Number and Operations in Base Ten (grades 2–5):** Items of this category measure students' ability to use the base ten system to write, read, and compute with whole numbers and decimals.
- **Operations and Algebraic Thinking (grades 2–5):** Items of this category measure students' ability to use numbers and perform operations. Students may be asked to show an understanding of properties, describe relationships and patterns, and compute fluently with all four operations.
- **Geometry (grades 2–5):** Items of this category measure students' ability to reason with shapes and their attributes. They may also be asked to classify shapes by properties, draw and identify lines and angles, and graph points on the coordinate plane to solve problems.

- **Measurement and Data (grades 2–5):** Items of this category measure students’ ability to use standard units of measure, represent and interpret data, and measure angles. Students may also be asked to calculate area and volume and relate them to multiplication and addition.
- **Number and Operations—Fractions (grades 3–5):** Items of this category measure students’ ability to recognize, read, and use fractions. Students may be asked to recognize fractions and unit fractions, equivalences of fractions, and compute with fractions using all four operations.
- **Statistics and Probability (grade 6 only):** Items of this category measure students’ ability to develop an understanding of statistical questions and their resultant data. They may also be asked to display data graphically, to summarize data by giving specific statistics, or to choose statistics representative of a distribution or context.
- **Ratios and Proportional Relationships (grades 6 and 7):** Items of this category measure students’ ability to understand and use ratios to solve problems. They may also be asked to calculate a unit rate, find the percent of a whole, and recognize and represent proportional relationships between quantities.
- **The Number System (grades 6–8):** Items of this category measure students’ ability to compute with rational numbers, which include negative numbers. They may also be asked to know that

there are numbers that are not rational and approximate them by rational numbers.

- **Expressions and Equations (grades 6–8):** Items of this category measure students’ ability to write, interpret, and use expressions and equations with rational numbers. They may also be asked to solve linear and pairs of linear equations and work with radical and integer exponents.
- **Geometry (grades 6–8):** Items of this category measure students’ ability to solve real-world problems involving two- and three-dimensional shapes and their area, surface area, and volume. They may also be asked to solve problems involving congruence, scale drawings, and similarity, and to apply the Pythagorean Theorem.
- **Statistics and Probability (grade 7 only):** Items of this category measure students’ ability to use random sampling to gain information and to draw inferences about a population or a comparative inference about two populations. They may also be asked to investigate chance probabilities of simple or compound events by approximating the probability of an event, developing probability models, or using organized lists, tables, or tree diagrams.
- **Statistics and Probability (grade 8 only):** Items of this category measure students’ ability to construct, interpret, and use scatter plots for bivariate data. They may also be asked to model the relationship between quantitative data

displayed in a scatter plot or table by a linear equation if a correlation between the data exists and to interpret the slope and intercepts in the context of the data.

- **Functions (grades 8 and 10):** Items of this category measure students’ ability to grasp the concept of functions and use functions and function notation to describe quantitative relationships. They may also be asked to build functions between two quantities, compare linear, quadratic, and exponential functions to solve problems, and to work with trigonometric functions, including applying and proving trigonometric identities.
- **Number and Quantity (grade 10 only):** Items of this category measure students’ ability to use and extend properties of the real number system, reason quantitatively, use units to solve problems, and to represent, model, or perform operations on vectors and matrices. They may also be asked to perform operations with complex numbers or to represent them graphically.
- **Algebra (grade 10 only):** Items of this category measure students’ ability to interpret, write, apply, and solve expressions, equations, and inequalities to solve problems. They may also be asked to understand and prove relationships and characteristics about single and multi-variable polynomials to solve systems of equations and/or inequalities in mathematical and applied contexts.

- **Geometry (grade 10 only):** Items of this category measure students' ability to prove geometric theorems, explain and use volume formulas to solve problems, and express geometric properties with equations. They may also be asked to use arc lengths, area sectors of circles, as well as circle theorems to solve problems, define and apply trigonometric ratios, and use congruence and similarity in transformations.
- **Statistics and Probability (grade 10 only):** Items of this category measure the students' ability to summarize, represent, interpret, evaluate, reason with, and understand data, models, statistical experiments, and probabilities. They may also be asked to compute, explain, understand, or apply probability rules to independent and conditional events.

Science

Grade 5 Science

- **Science and Technology:** Items of this category measure students' knowledge of scientific inquiry and the impacts of technology on society. Students may be asked to analyze experimental design and data. They may be asked to determine the area and volume of rectangles. Students may be asked to give examples of materials made available because of science and technology.
- **Earth and Space Science:** Items of this category measure students' knowledge of the solar

system and the physical characteristics of Earth. Students may be asked to describe the water cycle and explain how global patterns influence local weather and climate.

- **Physical Science:** Items of this category measure students' basic understanding of the periodic table, force and motion, and heat transfer. Students may be asked to investigate how heating and cooling affect substances and describe the effect of balanced and unbalanced forces on an object.
- **Life Science:** Items of this category measure students' basic understanding of cells, inheritance, and adaptation. Students may be asked to identify organisms, describe their characteristics, examine their reactions to changes in the environment, and analyze the effect of environmental changes on their survival.

Grade 8 Science

- **Scientific Thinking and Inquiry:** Items of this category measure students' understanding and application of scientific design. Students may be asked to design or critique investigations and analyze reasoning used in scientific arguments. They may also be asked to apply simple mathematical models to problems.
- **Matter and Reactions:** Items of this category measure students' basic understanding of the properties and structures of elements and chemical reactions. Students may be asked

to recognize and describe characteristics of atoms, molecules, compounds, and ions. They may be asked to describe the mass, weight, and density of an object. Students may be asked to demonstrate understanding of conservation of matter, endothermic and exothermic chemical reactions, factors that affect reaction rates, acidic and basic solutions, and evidence that chemical changes have taken place.

- **Forces:** Items of this category measure students' understanding of the concepts of force and motion. Students may be asked to determine and explain the buoyant force on an object. They may also be asked to determine and describe the effect of forces on the motion of objects.
- **Energy and Waves:** Items of this category measure students' basic knowledge of energy and how it is transferred. Students may be asked to recognize and describe various forms of energy including kinetic, potential, electrical, gravitational, sound, heat, and light energy.

Biology

- **Cell Biology and Biochemistry:** Items of this category measure students' basic understanding of the chemistry of living things and knowledge of cell structures and functions. Students may be asked to use simplified Bohr diagrams, describe the structure and properties of water, and describe the molecules found in living things. They may be asked to describe

cell organelles and compare and contrast prokaryotic and eukaryotic cells. They may also be asked to describe cellular respiration, mitosis, and meiosis.

- **Genetics and Evolution:** Items of this category measure students' knowledge of genes, biodiversity, and the theory of evolution. Students may be asked to describe how genes are passed from parents to offspring, and explain the relationship between DNA and proteins. They may be asked to explain recombination of genes in sexual reproduction and relate DNA similarities to degrees of kinship. Students may be asked to describe how genetic diversity helps organisms survive in a changing environment. They may also be asked to relate the concepts of heredity and natural selection to the modern theory of evolution.
- **Multicellular Organisms: Plants and Animals:** Items of this category measure students' knowledge of plant and animal biology. Students may be asked to describe the structure and function of plant parts and identify the roles of plants in the ecosystem. They may also be asked to identify and analyze the complementary activity of mammalian body systems.
- **Ecosystems:** Items of this category measure students' knowledge of biotic and abiotic factors in ecosystems. Students may be asked to analyze the effect of population changes on the

ecological balance of a community. They may also be asked to assess methods for monitoring and safeguarding water quality.

Health and Physical Education

Grade 5 Health and Physical Education

- **Communication and Emotional Health:** Items of this category measure students' understanding of intrapersonal and interpersonal emotional health. Students may be asked to describe mental and emotional illnesses. Students may be asked to identify components of positive or negative interpersonal communication.
- **Safety Skills:** Items of this category measure students' understanding of personal and community safety. Students may be asked to identify ways to prevent or treat common injuries.
- **Human Body and Personal Health:** Items of this category measure students' understanding of human body functions and personal health. Students may be asked to describe the basic structure and function of body parts and body systems. Students may be asked to identify strategies to maintain personal health.
- **Disease Prevention:** Items of this category measure students' understanding of behaviors that lead to disease in individuals and communities. Students may be asked to describe environmental and behavioral factors that influence disease.

- **Nutrition:** Items of this category measure students' understanding of the connection between nutrition and the many aspects of a person's life. Students may be asked to identify foods and food groups and their effects on physical and mental health.
- **Alcohol, Tobacco and Other Drugs:** Items of this category measure students' understanding of substance addiction. Students may be asked to describe factors influencing addiction including prevention and treatment.
- **Health Decision Making:** Items of this category measure students' understanding of health messages, products and behaviors. Students may be asked to identify health-related media influences. Students may be asked to explain how they can make healthy decisions and influence the health-related decision making of others around them.
- **Physical Education:** Items of this category measure students' understanding of the connection between the human body and physical movement. Students may be asked to describe how food and water influence the body's physical abilities. Students may be asked to identify specific muscles. Students may be asked to explain the benefit of specific physical activities, including stretching.

Grade 8 Health and Physical Education

- **Communication and Emotional Health:** Items of this category measure students' understanding of intrapersonal and interpersonal emotional health. Students may be asked to describe mental and emotional illnesses. Students may be asked to identify components of positive interpersonal communication.
- **Safety Skills and Community Health:** Items of this category measure students' understanding of personal and community safety. Students may be asked to identify ways to prevent or treat common injuries and threats. Students may be asked to classify health-related disparities.
- **Human Development and Sexuality:** Items of this category measure students' understanding of human sexuality and personal health. Students may be asked to describe the structure and function of body parts and body systems as well as behaviors necessary to remain healthy. Students may be asked to define behaviors related to development and sexuality.
- **Disease Prevention:** Items of this category measure students' understanding of behaviors and other contributing factors that lead to disease in individuals and communities. Students may be asked to describe environmental and behavioral factors that influence disease.

- **Nutrition:** Items of this category measure students' understanding of the connection between nutrition and the many aspects of a person's life. Students may be asked to identify the short-term or long-term effects of specific nutritional choices on physical health.
- **Alcohol, Tobacco and Other Drugs:** Items of this category measure students' understanding of substance use and addiction. Students may be asked to describe factors influencing substance use and consequences of substance use. Students may be asked to identify the relationship between substance use and other health outcomes.
- **Health Information and Advocacy:** Items of this category measure students' understanding of health messages and health advocacy. Students may be asked to explain how they can advocate for health. Students may be asked to identify ways in which technology influences personal and population health.
- **Physical Education:** Items of this category measure students' understanding of the connection between the human body and physical movement. Students may be asked to describe how food and water influence the body's physical abilities. Students may be asked to identify the principles of physical conditioning on the heart, other muscles, and other body parts. Students may be asked to explain the effects of physical activity on the body.

High School Health and Physical Education

- **Human Growth and Development:** Items of this category measure students' understanding of the physical and emotional changes represented in different stages of life. Students may be asked to identify physical, social and emotional changes as well as developmental issues in each life stage. Students may be asked to explain specific behaviors to support healthy growth development.
- **Sexuality and Reproduction:** Items of this category measure students' understanding of human sexuality and personal health. Students may be asked to define and describe abstinence. Students may be asked to identify consequences of sexual activity. Students may be asked to identify behaviors, including STI testing, that are important when involved in sexual activity.
- **Disease Prevention and Treatment:** Items of this category measure students' understanding of contributing factors that lead to disease in individuals and communities. Students may be asked to describe environmental and behavioral factors that influence disease. Students may be asked to identify means of delaying or reducing the risk of specific disease.
- **Nutrition:** Items of this category measure students' understanding of the connection between nutrition and the many aspects of a

person's life. Students may be asked to identify the short-term or long-term effects of specific nutritional choices on physical health.

- **Alcohol, Tobacco and Other Drugs:** Items of this category measure students' understanding of substance use and dependence. Students may be asked to describe factors influencing substance use and dependence. Students may be asked to identify the relationship between regulations and tobacco use.
- **Safety Skills:** Items of this category measure students' understanding of personal and community safety. Students may be asked to identify ways to prevent or treat common injuries and threats. Students may be asked to describe specific means of mitigating injury in the home, at work, and on the road. Students may be asked

to identify signs of abuse and resources to help those affected.

- **Locate Health Information and Assistance:** Items of this category measure students' understanding of health care services for individuals, families, and communities. Students may be asked to explain how they can solve personal or community health concerns. Students may be asked to identify ways in which regulations, cost, and accessibility influences personal and population health.
- **Physical Education:** Items of this category measure students' understanding of the connection between the human body and physical movement. Students may be asked to identify the five components of physical fitness.

This Guide and Other Resources

The item stems and resources in this guide have been created and assembled by the Office of the State Superintendent of Education (OSSE) and CTB/McGraw-Hill, the DC CAS test development vendor.

For a sample of released mathematics and science/biology items, go to: <http://www.nclb.osse.dc.gov/itembank.asp>. For a sample of released reading items, contact your Local Education Agency (LEA) for online access instructions.

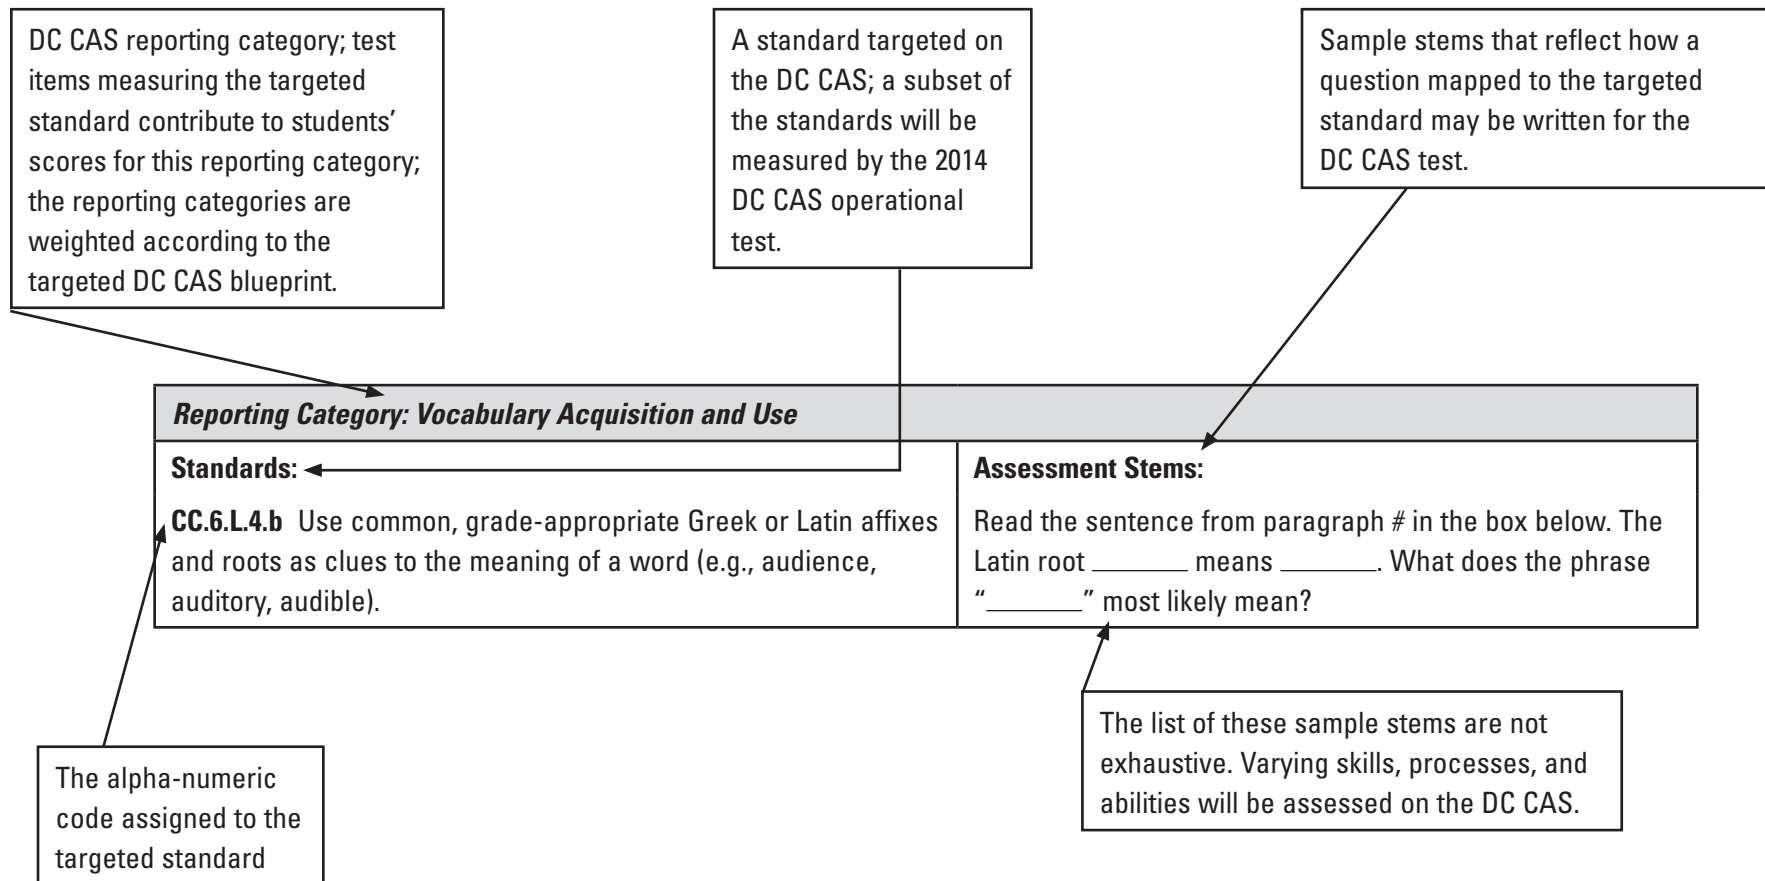

For questions or to provide feedback, please email OSSE.assessment@dc.gov.

DC CAS Target Blueprints, Tested Standards, and Rubrics/Sample Scoring Guides

The following pages provide target blueprints, tested standards, rubrics, and sample scoring guides to help teachers focus instruction relative to the DC CAS tests. Instruction should not be limited to the skills and processes identified in the standards in the tables. All approved standards represent what students should know and be able to do and will be assessed across administrations.

The 2014 DC CAS will remain aligned to the current DC Standards for science/biology and health, and to the Common Core State Standards for reading, mathematics, and composition.

Prior to using the Tested Standards tables, educators should review the sample below and the explanation of the content of each column.

2014 Target Blueprint Notes

- Reporting Category percentages are identical to the 2013 targets.
- Passage order (info and lit) has not changed from past DC CAS.
- The item counts above consider the operational test only.

Anchor Items

- Items will contribute to operational tests.
- Ideally, 23 selected-response (SR) items will be equating items, but some grades may have fewer items in the anchor set due to security breaches.

CCSS Grade 10

<i>Reporting Category</i>	<i>SR</i>	<i>CR</i>	<i>Total # Items (Target)</i>	<i>Total # Points (Target)</i>	<i>% Points (Target)</i>
Reading Informational Text	22	2	24	28	52%

Vocabulary Acquisition & Use	7	0	7	7	13%
TOTALS	45	3	48	54	100%

Embedded Field Test Items

- Embedded field test items consist of 16 SRs + 2 CRs for a total of 18 EFT items per form.
- Constructed-response (CR) items have been moved to precede two vocabulary items **when appropriate** so that a CR is not the last item in a session.
- The field test content will consist of one informational passage set and one literary non-fiction passage set (mapped to informational standards). Vocabulary items may be embedded in either.

Reading Tested Standards

Grade 2

Reporting Category: Vocabulary Acquisition and Use	
<p>Standards:</p> <p>CC.2.L.1 Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.</p> <p>CC.2.L.2.a Capitalize holidays, product names, and geographic names.</p> <p>CC.2.L.4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 2 reading and content, choosing flexibly from an array of strategies.</p> <p>CC.2.L.4.a Use sentence-level context as a clue to the meaning of a word or phrase.</p> <p>CC.2.L.4.b Determine the meaning of the new word formed when a known prefix is added to a known word (e.g., happy/unhappy, tell/retell).</p> <p>CC.2.L.4.e Use glossaries and beginning dictionaries, both print and digital, to determine or clarify the meaning of words and phrases.</p> <p>CC.2.L.5 Demonstrate understanding of word relationships and nuances in word meanings.</p> <p>CC.2.L.5.b Distinguish shades of meaning among closely related verbs (e.g., toss, throw, hurl) and closely related adjectives (e.g., thin, slender, skinny, scrawny).</p>	<p>Assessment Stems:</p> <p>Tell how [character] grows strong at the end of the story. Be sure to use capital letters where needed and the correct end marks. Support your answer with important details from the story.</p> <p>Find and mark the part of the sentence that needs a capital letter. [sentence with proper names and place names]</p> <p>Read the paragraph in the box below. [paragraph] What does the word _____ mean as it is used in this paragraph?</p> <p>Read the sentence. [sentence] What does the word _____ mean in this sentence?</p> <p>Read the sentence from the story in the box below. [sentence] The prefix <u>un-</u> added to _____ means the dog was . . .</p> <p>Read the dictionary entry in the box below. [dictionary entry] Read the sentence from the passage in the box below. [sentence] Which definition of the word “_____” <u>best</u> defines the word as it is used in this sentence?</p> <p>Read the sentence from the story in the box below. [sentence] Which word means that the weather is calm?</p> <p>Read the sentence from the article in the box below. [sentence] Which word most closely matches the meaning of _____ as it is used in this sentence?</p>

Reading Tested Standards

Grade 2

Reporting Category: Informational Text	
<p>Standards:</p> <p>CC.2.R.I.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.</p> <p>CC.2.R.I.2 Identify the main topic of a multi-paragraph text as well as the focus of specific paragraphs within the text.</p> <p>CC.2.R.I.3 Describe the connection between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text.</p> <p>CC.2.R.I.4 Determine the meaning of words and phrases in a text relevant to a grade 2 topic or subject area.</p> <p>CC.2.R.I.5 Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.</p> <p>CC.2.R.I.6 Identify the main purpose of a text, including what the author wants to answer, explain, or describe.</p> <p>CC.2.R.I.7 Explain how specific images (e.g., a diagram showing how a machine works) contribute to and clarify a text.</p> <p>CC.2.R.I.8 Describe how reasons support specific points the author makes in a text.</p>	<p>Assessment Stems:</p> <p>Look at the time line. [time line of events] Where on the time line did [event] happen?</p> <p>What is the message of the passage mostly about?</p> <p>What happened after the [discovery] was found?</p> <p>Read the sentence from the passage in the box below. [sentence] What does the phrase _____ mean in the passage?</p> <p>Read this part of an index. [index] On what page would you find information about _____?</p> <p>Which of these questions is the author answering in the article?</p> <p>What does the picture help the author explain?</p> <p>How does the list of _____ support the author's message?</p>
Reporting Category: Literary Text

Reading Tested Standards

Grade 3

Reporting Category: Literary Text (continued)

Standards:

CC.3.R.L.4 Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.

CC.3.R.L.5 Refer to parts of stories, dramas, and poems when writing or speaking about a text, using terms such as chapter, scene, and stanza; describe how each successive part builds on earlier sections.

CC.3.R.L.6 Distinguish their own point of view from that of the narrator or those of the characters.

CC.3.R.L.7 Explain how specific aspects of a text's illustrations contribute to what is conveyed by the words in a story (e.g., create mood, emphasize aspects of a character or setting).

CC.3.R.L.9 Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (e.g., in books from a series).

Assessment Stems:

As used in paragraph #, "_____" most likely means . . .

Why is "_____" a good title for the story?

Which phrase best shows that the narrator feels _____ about _____?

How is the scene in the picture most like the setting in the story?

Explain how [character] in "_____" is different from [character] in "_____." Support your answer with important details from the story.

<p>Standards:</p> <p>CC.9-10.R.L.4 Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language evokes a sense of time and place; how it sets a formal or informal tone).</p> <p>CC.9-10.R.L.5 Analyze how an author's choices concerning how to structure a text, order events within it (e.g., parallel plots), and manipulate time (e.g., pacing, flashbacks) create such effects as mystery, tension, or surprise.</p> <p>CC.9-10.R.L.6 Analyze a particular point of view or cultural experience reflected in a work of literature from outside the United States, drawing on a wide reading of world literature.</p> <p>CC.9-10.R.L.7 Analyze the representation of a subject or a key scene in two different artistic mediums, including what is emphasized or absent in each treatment (e.g., Auden's "Musée des Beaux Arts" and Breughel's Landscape with the Fall of Icarus).</p>	<p>Assessment Stems:</p> <p>Read these sentences from the story in the box below. [sentences] As used in the second sentence, what does the word _____ most nearly mean?</p> <p>What is the effect of the author's concluding paragraph?</p> <p>According to paragraph #, what lesson does the author learn about _____?</p> <p>Based on the passage, which of these aspects of _____ had the greatest influence on the author?</p>

Rubric for DC CAS Constructed-Response Items: Reading

<i>Score</i>	<i>Description</i>
3	The response demonstrates a complete understanding of the passage as it relates to the question. The response includes support that <ul style="list-style-type: none">• is clear and complete• provides relevant and specific details/information from the text
2	The response demonstrates a partial understanding of the passage as it relates to the question. The response includes support that <ul style="list-style-type: none">• is partially clear and/or partially complete• provides mostly relevant but somewhat general and/or inaccurate details/information from the text
1	The response demonstrates a minimal understanding of the passage as it relates to the question. The response includes support that <ul style="list-style-type: none">• is minimally correct or incomplete• provides inadequate, incorrect, or no relevant details/information from the text
0	The response demonstrates no understanding of the passage as it relates to the question. Any details/information that is included is incorrect or irrelevant.

Student responses that are awarded a score of 3 have

- fully answered all parts of the question posed
- demonstrated the student's understanding of the whole text relative to the question
- offered appropriate, clear, and full textual support for the answer
- explained direct quotations from the text that are used as support
- included inferences, when appropriate, based on the text

COMPOSITION

Rubrics for DC CAS Composition (Writing Prompts)

The following holistic rubrics are used for scoring the Composition student responses. Further information and training/sample prompts are available on the OSSE website at: <http://osse.dc.gov/service/dc-cas-composition-prompts>

Topic/Idea Development

Score	Description
6	<ul style="list-style-type: none"> Rich topic/idea development Careful and/or subtle organization Effective/rich use of language
5	<ul style="list-style-type: none"> Full topic/idea development Logical organization Strong details Appropriate use of language
4	<ul style="list-style-type: none"> Moderate topic/idea development and organization Adequate, relevant details Some variety in language
3	<ul style="list-style-type: none"> Rudimentary topic/idea development and/or organization Basic supporting ideas Simplistic language
2	<ul style="list-style-type: none"> Limited or weak topic/idea development, organization, and/or details Limited awareness of audience and/or task
1	<ul style="list-style-type: none"> Limited topic/idea development, organization, and/or details Little or no awareness of audience and/or task

Standard English Conventions

Score	Description
4	<ul style="list-style-type: none"> Control of sentence structure, grammar and usage, and mechanics (length and complexity of essay provide opportunity for student to show control of standard English conventions)
3	<ul style="list-style-type: none"> Errors do not interfere with communication and/or Few errors relative to length of essay or complexity of sentence structure, grammar and usage, and mechanics
2	<ul style="list-style-type: none"> Errors interfere somewhat with communication and/or Too many errors relative to length of the essay or complexity of sentence structure, grammar and usage, and mechanics
1	<ul style="list-style-type: none"> Errors seriously interfere with communication AND Little control of sentence structure, grammar and usage, and mechanics

Rubrics for DC CAS Composition (Writing Prompts)

Understanding Literary or Informational Text

<i>Score</i>	<i>Description</i>
4	The response demonstrates an understanding of the complexities of the text. <ul style="list-style-type: none">• Fully addresses the demands of the question or prompt• Effectively uses explicitly stated text as well as inferences drawn from the text to support an answer or claim
3	The response demonstrates an understanding of the text. <ul style="list-style-type: none">• Addresses the demands of the question or prompt• Uses some explicitly stated text and/or some inferences drawn from the text to support an answer or claim
2	The response is incomplete or oversimplified and demonstrates a partial or literal understanding of the text. <ul style="list-style-type: none">• Attempts to answer the question or address the prompt• Uses explicitly stated text that demonstrates some understanding
1	The response shows evidence of a minimal understanding of the text. <ul style="list-style-type: none">• Shows evidence that some meaning has been derived from the text to answer the question• Has minimal textual evidence

Note: The Composition prompt will also be aligned to a Common Core Reading standard. Responses will demonstrate degrees of mastery of that reading standard. Reading standards that the composition prompts will align to may include:

- grade 4: CC.4.R.I.1, CC.4.R.L.2, and CC.4.R.L.4 (see Reading tested standards)
- grade 7: CC.7.R.I.1, CC.7.R.I.8, CC.7.R.L.1, and CC.7.R.L.2 (see Reading tested standards)
- grade 10: CC.9-10.R.I.1, CC.9-10.R.I.2, CC.10.R.I.3, CC.9-10.R.L.2, and CC.9-10.R.L.6 (see Reading tested standards)

Statistics and Probability	5	0	5	5	8%
TOTALS	51	3	54	60	100%

Blueprint

- For all grades, Reporting Category percentages are aligned to Common Core State Standards.
- The three constructed-response (CR) operational items (two CRs for grade 2) will measure standards in the Reporting Category (RC) as indicated above. Where a range is indicated, a CR may or may not be used.
- If a CR is not used for a RC, its score points will be covered by selected-response (SR) items.
- There are 58 items (42 operational and 16 field test) per form for grade 2 and 70 items (54 operational and 16 field test) per form for grades 3–8 and 10.
- For grades 7, 8, and 10, Session 1 will be designated as the calculator session. Students will put away their calculators when Session 1 ends.
- CR items are each worth three points and are scored according to the criteria of a generic rubric and item-specific scoring guide. Certain grade 2 items will only be worth two points since they were selected from the *TerraNova* item pool.

Anchor Items

- Items will contribute to operational tests. Ideally, 25 SR (only) are equating items but some grades may have fewer items in the anchor set due to security breaches.

Embedded Field Test (EFT) Items

- Embedded field test (EFT) items consist of 14 SRs + 2 CRs for a total of 16 EFT items per form.
- Items are field tested to fill operational slots in future years.
- A CR item will never be the last item of a session.
- Total EFT items are distributed across two forms.
- Item development plans are based upon alignment to the Common Core transitional target blueprints.

Mathematics Tested Standards

Grade 2

Reporting Category: Operations & Algebraic Thinking	
<p>Standards:</p> <p>2.OA.1 Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</p> <p>2.OA.2 Fluently add and subtract within 20 using mental strategies. By end of grade 2, know from memory all sums of two one-digit numbers.</p> <p>2.OA.3 Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.</p> <p>2.OA.4 Use addition to find the total number of objects arranged in rectangular arrays with up to five rows and up to five columns; write an equation to express the total as a sum of equal addends.</p>	<p>Assessment Stems:</p> <p>[Name] has 37 pencils and needs a total of 96 pencils. How many more pencils does [Name] need in all to have a total of 96 pencils?</p> <p>Solve.</p> $\begin{array}{r} 15 \\ -8 \\ \hline \end{array}$ <p>Which set has an even number of items?</p> <p>(Artwork shows toy cars in an array.) Mathematics Tested Standards

Grade 3

Reporting Category: Operations & Algebraic Thinking

Standards:

3.OA.1 Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. *For example, describe a context in which a total number of objects can be expressed as 5×7 .*

3.OA.2 Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each.

3.OA.3 Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.

3.OA.4 Determine the unknown whole number in a multiplication or division equation relating three whole numbers.

3.OA.5 Apply properties of operations as strategies to multiply and divide. *Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)*

3.OA.6 Understand division as an unknown-factor problem. *For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.*

Assessment Stems:

There are 5 groups of marbles with 7 marbles in each group. Which of these shows how to find the total number of marbles?

There are 56 marbles. [Name] shares the marbles equally among 8 friends.
Which of these shows how to find the total number of marbles each friend receives?

[Name] has 8 groups of marbles with 7 marbles in each group. What is the total number of marbles that [Name] has in all?

Look at the number sentence.

$$8 \times \square = 48$$

Which number goes in the box to make the number sentence true?

Which of these is equal to $8 \times (5 + 2)$?

[Name] has 7 cats. She has 21 cat toys to split equally among 7 cats. In which number sentence does [box] represent the number of toys each cat will get?

Mathematics Tested Standards

Grade 4

Reporting Category: Numbers & Operations—Fractions (continued)

Standards:

4.NF.2 Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $\frac{1}{2}$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.

4.NF.3a Understand addition and subtraction of fractions as joining and separating parts referring to the same whole.

4.NF.3b Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model. *Examples:* $\frac{3}{8} = \frac{1}{8} + \frac{1}{8} + \frac{1}{8}$; $\frac{3}{8} = \frac{1}{8} + \frac{2}{8}$; $2\frac{1}{8} = 1 + 1 + \frac{1}{8} = \frac{8}{8} + \frac{8}{8} + \frac{1}{8}$.

4.NF.3c Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.

4.NF.3d Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem.

4.NF.4a Understand a fraction $\frac{a}{b}$ as a multiple of $\frac{1}{b}$. *For example, use a visual fraction model to represent $\frac{5}{4}$ as the product $5 \times (\frac{1}{4})$, recording the conclusion by the equation $\frac{5}{4} = 5 \times (\frac{1}{4})$.*

Assessment Stems:

(Students are given an inequality that compares two fractions; a box represents one of the fractions.)

Which number can be placed in the box to make the inequality true?

Look at this model.

(Artwork of a circle divided into equal parts and shaded in two different colors.)

Which expression represents the shaded parts of the model?

Which of these is equal to $\frac{1}{4} + \frac{1}{4} + \frac{1}{4}$?

Which expression is equal to [fraction]?

[Name 1] eats $\frac{1}{5}$ of a pizza. [Name 2] eats $\frac{2}{5}$ of the same pizza. How much of the pizza is left over?

Which of these is equal to $\frac{5}{4}$?

Mathematics Tested Standards

Grade 4

Reporting Category: Numbers & Operations—Fractions (continued)

Standards:

4.NF.4b Understand a multiple of $\frac{a}{b}$ as a multiple of $\frac{1}{b}$, and use this understanding to multiply a fraction by a whole number. *For example, use a visual fraction model to express $3 \times \left(\frac{2}{5}\right)$ as $6 \times \left(\frac{1}{5}\right)$, recognizing this product as $\frac{6}{5}$. (In general, $n \times \left(\frac{a}{b}\right) = \frac{(n \times a)}{b}$.)*

4.NF.4c Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. *For example, if each person at a party will eat $\frac{3}{8}$ of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?*

4.NF.5 Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. *For example, express $\frac{3}{10}$ as $\frac{30}{100}$, and add $\frac{3}{10} + \frac{4}{100} = \frac{34}{100}$.*

4.NF.6 Use decimal notation for fractions with denominators 10 or 100. *For example, rewrite 0.62 as $\frac{62}{100}$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.*

4.NF.7 Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual model.

Assessment Stems:

Solve.

$$3 \times \frac{2}{5} =$$

[Name] practices the dance 5 days a week. He practices for [fraction] hour each time. What is the total number of hours [Name] spends practicing the dance?

Which of these correctly models the sum of (students are shown two decimals with denominators of 10 and 100)?

Which fraction is equal to 0.62?

Look at the number sentence.

$$\underline{\hspace{2cm}} > 0.25$$

Which of these completes the number sentence?

Mathematics Tested Standards

Grade 4

Reporting Category: Measurement and Data

Standards:

4.MD.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table.

4.MD.2 Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.

4.MD.3 Apply the area and perimeter formulas for rectangles in real world and mathematical problems.

4.MD.4 Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Solve problems involving addition and subtraction of fractions by using information presented in line plots.

4.MD.5a An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through $\frac{1}{360}$ of a circle is called a “one-degree angle,” and can be used to measure angles.

4.MD.6 Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.

4.MD.7 Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.

Assessment Stems:

Complete the conversion table below.

(Students are given a table showing feet-to-inches conversion for 1, 2, and 4 feet—12, 24, and 48 inches; 3 is blank.)

[Name] bought 5 muffins for \$4. If each muffin cost the same amount, how much did 1 muffin cost?

The area of a rectangular-shaped kitchen is 135 square feet. The length of the kitchen is 9 feet. What is the width of the kitchen?

Measure the lengths of the insects shown. Then represent the lengths in a line plot. What is the difference in length between the longest and shortest insects?

The image shows two rays intersecting at point *T*, the center of the circle.

(Artwork shows circle with two rays forming an angle that is measured in degrees.)

What fraction of this circle is the angle formed by these two rays?

Look at the angle *QRS* on the protractor.

(Artwork shows protractor with angle labeled QRS.)

Which of these is the closest measure of this angle?

This equation shows the sum of the two angles in the triangle below.

$$25 + x = 85$$

(Artwork shows triangle with part of the angle labeled as 25 degrees and the rest labeled as x.)

What is the measure of angle *x*?

Grade 5

Reporting Category: Numbers and Operations—Fractions

Standards:

5.NF.1 Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators.

5.NF.2 Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers.

5.NF.3 Interpret a fraction as division of the numerator by the denominator $\left(\frac{a}{b} = a \div b\right)$. Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem.

5.NF.4a Interpret the product $\left(\frac{a}{b}\right) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$.

5.NF.4b Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.

5.NF.5a Interpret multiplication as scaling (resizing), by comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.

Assessment Stems:

Solve.

$$5\frac{7}{8} - 3\frac{1}{4} =$$

[Name]’s house is located $\frac{3}{4}$ of a mile from the library and $\frac{5}{8}$ of a mile from the store. How much farther is [Name]’s house from the library than it is from the store?

[Name] had 5 yards of ribbon. She used all of it to wrap 4 equal-sized packages. How much ribbon did [Name] use on each package?

Look at the multiplication expression.

$$\frac{2}{3} \times 4$$

Which of the following models also represents this multiplication?

What is the area of the rectangle below?

(Students are given a rectangle with fractional side lengths on a grid that has a scale of fractional increments.)

[Name] multiplied 100 by $\frac{1}{8}$ as shown in the number sentence below.

$$100 \times \frac{1}{8} = 12\frac{1}{2}$$

If [Name] multiplies 100 by a fraction larger than $\frac{1}{8}$, what will happen to the size of the product?

Grade 6

Reporting Category: Expressions and Equations (continued)

Standards:

6.EE.2c Evaluate expressions at specific values of their variables. Include expressions that arise from formulas used in real-world problems. Perform arithmetic operations, including those involving whole-number exponents, in the conventional order when there are no parentheses to specify a particular order (Order of Operations).

6.EE.3 Apply the properties of operations to generate equivalent expressions.

6.EE.4 Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them).

6.EE.5 Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.

6.EE.6 Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.

6.EE.7 Solve real-world and mathematical problems by writing and solving equations of the form $x + p = q$ and $px = q$ for cases in which p , q and x are all nonnegative rational numbers.

6.EE.8 Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions; represent solutions of such inequalities on number line diagrams.

Assessment Stems:

Look at the expression below.

$$120 \div m + 7$$

What is the value of this expression when $m = 8$?

Which expression is equivalent to the expression below?

$$5(4x + 3)$$

Which expression is equivalent to the expression below?

$$6x + 2x - 5$$

Look at the set of numbers below.

(Students are given a small set of numbers.)

In which inequality can x equal all numbers in the set?

A movie theater charges \$8 for a movie ticket. They sell bags of popcorn for \$4. Which expression represents the total cost for m number of movie tickets sold and p number of bags of popcorn sold in one day?

The total cost, q , of shipping x boxes is represented by the equation below, where p represents the shipping cost per box.

$$px = q$$

If the total cost to ship 15 boxes is \$59.25, what is the shipping cost per box?

Complete the graph for the following situation.

Juan needs to make a 93 or higher on his test to get an A.

Standards:

8.EE.5 Graph proportional relationships, interpreting the unit rate as the slope of the graph. Compare two different proportional relationships represented in different ways. *For example, compare a distance-time graph to a distance-time equation to determine which of two moving objects has greater speed.*

8.EE.6 Use similar triangles to explain why the slope m is the same between any two distinct points on a non-vertical line in the coordinate plane; derive the equation $y = mx$ for a line through the origin and the equation $y = mx + b$ for a line intercepting the vertical axis at b .

8.EE.7a Give examples of linear equations in one variable with one solution, infinitely many solutions, or no solutions. Show which of these possibilities is the case by successively transforming the given equation into simpler forms, until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers).

8.EE.7b Solve linear equations with rational number coefficients, including equations whose solutions require expanding expressions using the distributive property and collecting like terms.

8.EE.8a Understand that solutions to a system of two linear equations in two variables correspond to points of intersection of their graphs, because points of intersection satisfy both equations simultaneously.

8.EE.8b Solve systems of two linear equations in two variables algebraically, and estimate solutions by graphing the equations. Solve simple cases by inspection.

8.EE.8c Solve real-world and mathematical problems leading to two linear equations in two variables. *For example, given coordinates for two pairs of points, determine whether the line through the first pair of points intersects the line through the second pair.*

Assessment Stems:

The table below shows the distance a train travels at a constant rate over time.

(a table showing the miles traveled by a train at constant rate for 4 hours)

The equation shows the distance a car travels at a constant rate.

(a distance-time equation given)

What is the difference in their speeds?

Look at the graph below.

(Artwork of the graph of a linear equation)

Which equation represents the line on this graph?

How many solutions would this equation have?

$$-4x = 6 - 4x$$

What is the solution to the linear equation

$$\frac{1}{2}x + 3(1.5x - 7) = 84?$$

Is $(3, 6)$ a solution for this system of equations?

$$5x - 2y = 3$$

$$2x - y = 0$$

Look at the system of equations below.

$$2y = 5$$

$$3x + 2y = 6$$

What is the solution to the system of equations?

You and a friend go to a comic book store. You buy 3 classic comic books and 2 modern comic books, and your bill is \$11.00. Your friend's bill is \$15.00, and he purchased 2 classic comic books and 4 modern comic books. How much does a classic comic book cost? How much does a modern comic book cost?

Mathematics Tested Standards

Grade 10

Reporting Category: Algebra (continued)

Standards:

A.APR.7 (+) Understand that rational expressions form a system analogous to the rational numbers, closed under addition, subtraction, multiplication, and division by a nonzero rational expression; add, subtract, multiply, and divide rational expressions.

A.CED.1 Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational and exponential functions.

A.CED.2 Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

A.CED.3 Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context. *For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.*

A.CED.4 Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. *For example, rearrange Ohm's law $V = IR$ to highlight resistance R .*

A.REI.1 Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.

A.REI.2 Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise.

Assessment Stems:

Combine and simplify.

$$\frac{x^3 - x^2 + -2x}{x^2 + 2x} \cdot \frac{x^2 + 5x + 6}{x - 2} - \frac{2x^2 + 3x - 9}{x}$$

[Name] has two jobs. She earns \$75 per day at Job 1 and \$26 per hour at Job 2. Last week, [Name] worked at Job 1 for 3 days and at Job 2 for x hours. She earned a total of \$927 for the week. Which equation can be used to find how many hours [Name] worked at Job 2 last week?

Which of these shows the graph of $y = -\frac{2}{3}x - 2$?

[Names] are planting flower bulbs. [Name A] can plant 3 bulbs in 6 minutes. [Name B] has already planted 14 bulbs and plants 7 bulbs in 12 minutes. [Names A and B] decide to plant at the same time. How long will it take for [Names A and B] to plant the same number of flower bulbs? By the time they are equal how many bulbs would [Names A and B] have planted?

Plane A leaves the Norfolk airport traveling west at 450 miles per hour. Plane B leaves the same airport traveling east at 360 miles per hour. In how many hours will Plane A and Plane B be exactly 1,620 miles apart?

What property of equality is demonstrated here?

$$5x = 125$$

Then

$$5x + 17 = 125 + 17$$

Look at these steps in solving a rational equation.

(Students are given multiple steps in solving a rational equation.)

Which statement explains why the final equation may have more solutions than the original equation?

Mathematics Tested Standards

Grade 10

Reporting Category: Algebra (continued)

Standards:

A.REI.3 Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.

A.REI.4a Use the method of completing the square to transform any quadratic equation in x into an equation of the form $(x - p)^2 = q$ that has the same solutions. Derive the quadratic formula from this form.

A.REI.4b Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers a and b .

A.REI.6 Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.

A.REI.7 Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. *For example, find the points of intersection between the line $y = -3x$ and the circle $x^2 + y^2 = 3$.*

A.REI.10 Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).

A.REI.11 Explain why the x -coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.

Assessment Stems:

Which of these is the solution to the inequality below?

$$2 + |2x - 4| < 8$$

Complete the square. Fill in the value that makes this a perfect square quadratic.

$$p^2 + 12p + \underline{\hspace{1cm}}$$

Solve for $x^2 + 1 = 122$ for x .

Solve for $x^2 - 8x - 9 = -24$ for x .

Solve for $\frac{1}{3}x^2 + x + 1 = 5$ for x .

Look at the system of equations.

$$y = 2x - \frac{5}{6}$$

$$y = -x + 12$$

What is the solution to the system?

Solve the system of equations.

$$y = x^2$$

$$y = 8 - x^2$$

Graph this function.

(Artwork shows a two column table with one column labeled x and one column labeled y ; below the x list $-7, -6, -5, -4$; below the y list $0, 1, 2, 3$; then includes a coordinate plane for graphing the equation.)

Graph these equations. How many solutions does this system have?

$$y = -\frac{3}{5}x + 4$$

$$y = -\frac{3}{5}x + 4$$

(Artwork includes a coordinate plane for graphing.)

Reporting Category: Algebra (continued)	
<p>Standards:</p> <p>A.REI.12 Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.</p> <p>A.SSE.1b Interpret complicated expressions by viewing one or more of their parts as a single entity.</p> <p>A.SSE.2 Use the structure of an expression to identify ways to rewrite it.</p> <p>A.SSE.3b Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines.</p> <p>A.SSE.3c Use the properties of exponents to transform expressions for exponential functions. <i>For example, the expression $1.15t$ can be rewritten as $\left(\frac{1.151}{12}\right) 12t \approx 1.01212t$ to reveal the approximate equivalent monthly interest rate, if the annual rate is 15%.</i></p>	<p>Assessment Stems:</p> <p>Look at the system of linear inequalities. $y \leq 2x + 7$ $y > x - 3$ Which of these graphs shows the solution set of the system?</p> <p>The expression below predicts the population of a particular animal each year, y. $100,000(1.04)^y$ Explain what the term $(1.04)^y$ represents in this context.</p> <p>Look at the expression. $10^{x^2+2xy+y^2}$ Which of these is equivalent to the expression?</p> <p>The equation of a parabola is $y = 2x^2 + 8x - 10$. Write the equation in vertex form.</p> <p>Simplify. $c^4(c^{-3})$</p>
Reporting Category: Functions	
<p>F.IF.2 Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.</p> <p>F.IF.4 For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.</p>	<p>Evaluate $y = x^4 - \frac{2}{3}x^2 + 9$ for $x = \sqrt{3}$.</p> <p>Find the x-intercept of the following equation. Simplify your answer. $6x + 9y = -18$</p>

Mathematics Tested Standards

Grade 10

Reporting Category: Functions (continued)

Standards:

F.IF.6 Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.

F.IF.7a Graph linear and quadratic functions and show intercepts, maxima, and minima.

F.IF.7b Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.

F.BF.1a Determine an explicit expression, a recursive process, or steps for calculation from a context.

F.BF.1b Combine standard function types using arithmetic operations. For example, build a function that models the temperature of a cooling body by adding a constant function to a decaying exponential, and relate these functions to the model.

F.LE.2 Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).

F.LE.3 Observe, using graphs and tables, that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function.

Assessment Stems:

Find the slope of a line that passes through points (3, 5) and (−3, 2). Simplify your answer.

Plot $f(x) = -\frac{x^2}{4} - 4$ on the grid. Be sure to label the maximum, the minimum, and the intercepts if there are any.

In a certain cell phone plan, the cost of text messaging is given by this function.

$$c(t) = \left| \frac{t}{10} + 1 \right|$$

In the function, t is the number of texts and $c(t)$ is the cost, in dollars. Which graph represents the function?

[Name] played a game and recorded the total points each time he played in the list below.

(Artwork is a list, which forms a pattern.)

Find the next number in the pattern. If n represents the n th term, write a relationship to find the n th term.

What is $(f + g)(x)$?

$$f(x) = x^2$$

$$g(x) = -x^2 + 4$$

Look at the graph below.

(Artwork of a coordinate plane containing a graphed line)

Which linear equation represents this line?

By looking at the following equations, which one will eventually surpass the others?

$$y = x^{100}$$

$$y = 100x$$

$$y = 100^x$$

$$y = x^{100} + 100x$$

Mathematics Tested Standards

Grade 10

Reporting Category: Geometry	
<p>Standards:</p> <p>G.CO.3 Given a rectangle, parallelogram, trapezoid, or regular polygon, describe the rotations and reflections that carry it onto itself.</p> <p>G.CO.5 Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.</p> <p>G.CO.6 Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to decide if they are congruent.</p> <p>G.CO.7 Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.</p> <p>G.CO.8 Explain how the criteria for triangle congruence (ASA, SAS, and SSS) follow from the definition of congruence in terms of rigid motions.</p> <p>G.CO.9 Prove theorems about lines and angles. Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment's endpoints.</p> <p>G.CO.10 Prove theorems about triangles. Theorems include: measures of interior angles of a triangle sum to 180°; base angles of isosceles triangles are congruent; the segment joining midpoints of two sides of a triangle is parallel to the third side and half the length; the medians of a triangle meet at a point.</p> <p>G.SRT.1a A dilation takes a line not passing through the center of the dilation to a parallel line, and leaves a line passing through the center unchanged.</p>	<p>Assessment Stems:</p> <p>Describe the transformation that would carry this shape onto itself. <i>(Artwork shows a kite or triangle or octagon.)</i></p> <p>Which transformation was applied to figure $ABCD$ to arrive at figure $A'B'C'D'$?</p> <p>Describe a transformation that would allow this shape to carry this regular polygon on to itself. <i>(Artwork shows any geometric shape [triangle, octagon, pentagon] with a line drawn somewhere through the shape.)</i></p> <p>Determine if these two triangles are congruent. <i>(Artwork shows two congruent triangles, one turned 90 degrees from the other.)</i></p> <p>For each of the following right triangles determine the measure for the missing side. <i>(Artwork shows a triangle with the shorter sides labeled as 5 and 12 and a question mark for the hypotenuse.)</i></p> <p>Complete the proof that line AB is perpendicular to line BC. <i>(Artwork shows two perpendicular lines AB and CD both meeting at point E, with adjacent angles AEC and AED marked.)</i></p> <p>In the diagram below, line n passes through points A and B and is parallel to line m, which passes through point C. Prove that the sum of the angles in triangle ABC is 180°.</p> <p>Line m has the equation $y = 4x - 1$. What is the equation of the line after dilation with a scale factor of 3, centered at the origin?</p>

Mathematics Tested Standards

Grade 10

Reporting Category: Geometry (continued)

Standards:

G.SRT.1b The dilation of a line segment is longer or shorter in the ratio given by the scale factor.

G.SRT.2 Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.

G.SRT.4 Prove theorems about triangles. Theorems include: a line parallel to one side of a triangle divides the other two proportionally, and conversely; the Pythagorean Theorem proved using triangle similarity.

G.SRT.5 Use congruence and similarity criteria for triangles to solve problems and to prove relationships in geometric figures.

G.SRT.6 Understand that, by similarity, side ratios in right triangles are properties of the angles in the triangle, leading to definitions of trigonometric ratios for acute angles.

G.SRT.7 Explain and use the relationship between the sine and cosine of complementary angles.

G.SRT.8 Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.

Assessment Stems:

The corresponding sides of triangle *A* and triangle *B*, the image of triangle *A* after dilation, have a scale factor of 3:7. If the length of one side of triangle *A* is 36 inches, what is the length of the corresponding side of triangle *B*?

Determine whether the triangles below are similar.

Given a figure of a triangle *VWZ* imbedded in triangle *VXY* and a partial proof:
 $YZ/VZ = WX/VW$. Complete the proof that line *WZ* is parallel to line *XY*.

The rhombus below is cut by diagonals. What is the value of angle *EBC*?

Evaluate. Write your answer as an integer or, if a decimal, round to the nearest hundredth.

$\cos 24 = \underline{\hspace{1cm}}$

Given figure of right triangle *ABC*:

The sine of angle *C* is $\frac{1}{2}$, and the cosine of angle *C* is $\sqrt{\frac{3}{2}}$. What is the cosine of angle *A*?

Look at the figure below.

(Students are given an image of a tree with a tree house, and a ladder leaning against the tree with its top at the base of the tree house. The length, in feet, of the ladder is labeled, and the angle where the ladder meets the ground is given. A right angle indicator is given at the base of the tree.)

How many feet above the ground is the tree house?

Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.</p> <p>S.ID.6a Fit a function to the data; use functions fitted to data to solve problems in the context of the data. Use given functions or choose a function suggested by the context. Emphasize linear and exponential models.</p> <p>S.ID.9 Distinguish between correlation and causation.</p> <p>S.IS.6c Fit a linear function for a scatter plot that suggests a linear association.</p>	<p>Assessment Stems:</p> <p>Look at the data. 23, 23, 28, 26, 39, 33, 36, 38, 29, 25</p> <p>Which of these box plots represents these data?</p> <p>[Name] surveyed students at her high school to determine how many hours of sleep they get at night. She displays her data with 4 box plots, one for each grade level. (Students are given box plots for freshman, sophomore, junior, senior.)</p> <p>Which data set has the largest interquartile range?</p> <p>Given a two-way frequency table, determine whether the association is positive or negative.</p> <p>Look at the scatter plot. Which of these functions <u>best</u> models the data?</p> <p>Which of the following is an example of correlation?</p> <p>The scatter plot below shows the number of hours of sunlight a plant gets each week and the height of the plant each week. (Students are given a scatter plot showing the results.)</p> <p>Which function best models the relationship between the number of hours of sunlight each week and the height of the plant each week?</p>

Rubric for DC CAS Constructed-Response Items: Mathematics

Score	Description
3	<p>The response demonstrates a thorough understanding of the mathematical concepts and processes needed to complete the task.</p> <ul style="list-style-type: none"> • Response is correct and complete. • Response shows application of a reasonable and relevant strategy. • Mathematical ideas are expressed coherently through clear, complete, logical, and fully developed responses using words, calculations, and/or symbols as appropriate.
2	<p>The response demonstrates a general and/or partial understanding of the mathematical concepts and processes needed to complete the task.</p> <ul style="list-style-type: none"> • Response is mostly correct, and may be only partially complete. • Response shows application of a reasonable and relevant strategy, even though only partially applied. • Mathematical ideas are expressed generally or partially using words, calculations, and/or symbols as appropriate.
1	<p>The response demonstrates a minimal and/or limited understanding of the mathematical concepts and processes needed to complete the task.</p> <ul style="list-style-type: none"> • Response is only minimally correct or incomplete. • Application of a strategy is indicated or implied, but the strategy may reflect a misunderstanding of mathematical concepts and/or procedures. • Mathematical ideas are expressed in a limited manner and are flawed. Words, calculations, and/or symbols are attempted to be used appropriately but may be missing.
0	<p>The response demonstrates no understanding of the mathematical concepts and processes needed to complete the task.</p> <ul style="list-style-type: none"> • Response is incorrect, incomplete, or missing. • Response shows no application of a strategy or application of an irrelevant strategy. • Mathematical ideas cannot be interpreted or lack sufficient evidence to support even a limited understanding.

Student responses that are awarded a score of 3 have

- fully answered all parts of the question
- offered appropriate, clear, and full work to support their answer, as needed

Blueprint Notes

- Reporting Category percentages are identical to the 2013 targets.
- To satisfy Range of Knowledge alignment criterion, at least one indicator from every standard should ideally be tested each year and every indicator should be tested within a three-year period. For 2014, exceptions may be necessary for grades 5, 8, and Biology due to item pool limitations.
- CR items are each worth two points and are scored with item-specific rubrics/scoring guides.

Anchor Items

- Items will contribute to operational tests.
- Items are distributed across all three sessions.
- **NOTE:** Anchor set for science should consist of 23 SR items. Items in the anchor set will be distributed across strands in proportion to the overall blueprint. Wherever possible, an item will not serve as an anchor more than two years in sequence.

Embedded Field Test Items

- For 2014, 12 selected-response (SR) and two constructed-response (CR) items are embedded field test (EFT) items in each of two forms (24 SR items and four CR items total).
- Items are field tested to fill operational slots in future years.
- A CR item will never be the last item of a session.
- Total EFT items are distributed across strands based upon the current or projected future gaps in the item pool.
- Item development plans are based upon the need to fill gaps in the RC percentages from OSSE's proposed blueprint for the rearticulated science standards (February 2010 version).

Describe the range of height for the students in this class.</p> <p>Two researchers want to know [fact]. After one month, one researcher finds [different result] than the other researcher. Which of these best explains why the two researchers had different results?</p> <p>Read about the [type of experiment]. Which of these statements is an inference about the experiment? Which is an observation?</p> <p>Which of these statements best describes a good set of instructions for an investigation?</p> <p>Below are the steps [Name] followed during an investigation. Why might her results <u>not</u> be very accurate?</p> <p>Which of these statements best describes a controlled variable in an investigation?</p>

Science Tested Standards

Grade 5

Reporting Category: Science and Technology (continued)	
<p>Standards:</p> <p>5.2.6 Explain the distortion inherent in using only a portion of the data collected to describe the whole. Understand that it is sometimes acceptable to discard data.</p> <p>5.3.1 Give examples of technology, such as telescopes, microscopes, and cameras, that enable scientists and others to observe things that are too small or too far away to be seen without them and to study the motion of objects that are moving very rapidly or are hardly moving.</p> <p>5.3.2 Give examples of advances in technology that have positively and/or negatively affected society.</p> <p>5.3.3 Give examples of materials not present in nature that have become available because of science and technology, such as cloth, metal alloys, plastic, ceramics, and concrete.</p>	<p>Assessment Stems:</p> <p>[A teacher's] science class is collecting data on [subject of study]. The students decide to use only the average [data] to make it easier to report their results. Which of the following is the most likely problem with this procedure?</p> <p>Which of these tools helped scientists to study [a planet]?</p> <p>[Brief history about a technological device]. Which of the following statements explains how [technological device] has positively affected society?</p> <p>Which of these materials/objects is/is not present in nature?</p>
Reporting Category: Earth and Space Science	
<p>5.4.1 Describe that, like all planets and stars, the Earth is approximately spherical in shape.</p> <p>5.4.2 Observe how telescopes are used both to magnify images of distant objects in the sky, including the moon and the planets, and to gather enough light from very dim objects to make them visible.</p> <p>5.4.3 Observe and describe that stars vary in size, but they are so far away that they look like points of light.</p> <p>5.5.1 Describe the Earth as part of a system called the solar system, which includes the sun (a star), planets, comets, asteroids, and many moons.</p>	<p>What is the best way to describe the shape of planets and stars?</p> <p>Which of these describes an advantage to using a telescope to see [objects a telescope would be used to observe]?</p> <p>[Name] is looking at some stars in the night sky. She thinks they look like little points of light. Which of these causes the stars to look like points of light?</p> <p>Which of these best describes a solar system?</p>

Science Tested Standards

Grade 5

Reporting Category: Earth and Space Science (continued)	
<p>Standards:</p> <p>5.5.2 Recognize that the Earth is the third planet from the sun in our solar system.</p> <p>5.5.3 Demonstrate how the Earth orbits the sun in a year's time, and Earth rotates on its axis about once every 24 hours.</p> <p>5.5.4 Explain that the alternation between day and night and the apparent movement of the sun, moon, and stars across the sky depend on the rotation of the Earth on its axis.</p> <p>5.5.5 Explain that the air around us is matter and has weight (a force) and exerts pressure; explain that air pressure varies a little from place to place and from time to time.</p> <p>5.5.6 Describe that winds blow from areas of higher pressure to areas of lower pressure.</p> <p>5.5.7 Explain how global patterns, such as the jet stream and ocean currents, influence local weather and climate in ways that can be measured in terms of temperature, pressure, wind direction and speed, and amounts of precipitation.</p> <p>5.6.1 Describe that when liquid water evaporates, it turns into a gas (vapor) mixed into the air, and can condense and reappear as a liquid when cooled or as a solid (ice) if cooled below the freezing point of water.</p> <p>5.6.2 Explain how water moves in air masses from one place to another in the form of clouds, fog, or as invisible water vapor, and falls to the Earth as rain, hail, sleet, or snow.</p> <p>5.6.3 Describe that clouds are made of tiny droplets of water or ice crystals.</p>	<p>Assessment Stems:</p> <p>Which of these [choices] describes where Earth is found in the solar system?</p> <p>Here is a model of an event that occurs in our solar system. What does this model represent?</p> <p>In these pictures why does the moon appear to move across the sky?</p> <p>Which of these describes how air pressure changes as a hiker climbs a mountain?</p> <p>A weather map is shown. (Picture of weather map w/compass.) The meteorologist is predicting strong winds. In which direction will the wind <u>most likely</u> be blowing?</p> <p>Describe how ocean currents and the wind work together to affect weather patterns.</p> <p>Which picture/of these [choices] shows/is an example of a substance as both a liquid and a gas [or solid] OR a liquid changing to a solid?</p> <p>Which of these <u>best</u> describes how water moves from place to place?</p> <p>What are clouds made up of?</p>

Science Tested Standards

Grade 5

Reporting Category: Earth and Space Science (continued)	
Standards: 5.6.4 Explain that water on Earth cycles through different forms and in different locations (e.g., underground water and vapor in the atmosphere). 5.6.5 Using maps and globes, recognize that the Earth's oceans are all connected as one body of water that covers about three-quarters of the Earth's surface.	Assessment Stems: A diagram of the water cycle is shown. <i>(Diagram of water cycle.)</i> Which form of water is shown [at place indicated on diagram]? Which statement <u>best</u> describes Earth's oceans?
Reporting Category: Physical Science	
5.7.1 Recognize that all matter is made of small particles called atoms, which are too small to see with our eyes; describe how atoms may combine to form molecules or crystalline solids (compounds). 5.7.2 Recognize that there are more than 100 different kinds of atoms (each called an element), which are displayed on the periodic table of the elements. 5.7.3 Explain that all matter is made up of an element, a compound, or mixtures of elements and compounds. 5.8.1 Describe that heating and cooling cause changes in the properties of substances. For example, liquid water can turn into steam by boiling, and liquid water can turn into ice by freezing. 5.8.2 Explain that many kinds of chemical changes occur faster at higher temperatures. 5.8.3 Explain that when a warm object and a cool one are placed in contact, heat flows from the warmer object to the cooler one until they are both at the same temperature. Know that heat transfer can also occur at a distance by radiation. 5.8.4 Describe how some materials conduct heat much better than others, and poor conductors (insulators) can be used to reduce heat loss or gain.	Which statement <u>best</u> describes matter? Which of these best describes the difference/a similarity between all of the elements in the periodic table? Which of these is all matter made up of? Which of these will help change a [phase] to a [different phase]? Which of these causes a chemical change to occur faster? A student places an ice pack on her injured ankle. Which of these <u>best</u> describes the the flow of energy between the student's ankle and ice pack over the next 15 minutes? A student needs to choose which container to place his lunch in to keep it cold until lunchtime. <i>(Art and descriptions of four containers.)</i> Into which container should the student place his lunch?

Science Tested Standards

Grade 5

Reporting Category: Physical Science (continued)	
<p>Standards:</p> <p>5.9.1 Explain that objects can move with a very wide range of speeds, with some moving very slowly and some moving too quickly for people to see them.</p> <p>5.9.2 Demonstrate that if the forces acting on an object are balanced so that the net force is zero, the object will remain at rest if it is initially at rest or will maintain a constant speed and direction if it is initially moving.</p> <p>5.9.3 Describe that unbalanced forces cause changes in the speed and/or direction of motion of an object (acceleration).</p> <p>5.9.4 Describe that, for an object moving in a straight line, acceleration, a, is the change in velocity, v, divided by the time, t, that change takes ($a = v \div t$).</p> <p>5.9.5 Describe that the greater the net force, F, applied to a body, the greater its acceleration, a. Describe that the greater the mass, m, of an object, the smaller the acceleration produced by a given force.</p> <p>5.9.6 Demonstrate and explain that things on or near Earth are pulled toward Earth's center by the gravitational force that Earth exerts on them.</p>	<p>Assessment Stems:</p> <p>Which of these moves too quickly to see?</p> <p><i>(Diagram of two objects leaning against each other.)</i></p> <p>Which of these statements is true?</p> <p>[Names] are [moving] forward at the same speed. At one point, [Name 1] accidentally bumps into [Name 2] from the side. Which of these statements best describes what happens to [Name 2]'s movement?</p> <p>[Name] wants to calculate the acceleration of a falling [object]. Which of these pairs of measurements does [Name] need to calculate acceleration?</p> <p>[Name 1] has an [object] and [Name 2] has an [object]. They each pushed their [objects] across the playground with the same force. Explain why [Name 1]'s [object] went much slower than [Name 2]'s.</p> <p>Which force causes an [object] to fall toward the ground when it is dropped?</p>
Reporting Category: Life Science	
<p>5.10.1 Describe that some organisms consist of a single cell that needs an environment that can supply food, water, sometimes oxygen, and a way to dispose of waste. (Some single-celled organisms are anaerobes.)</p> <p>5.10.2 Explain that some organisms are made of a collection of similar cells that benefit from cooperating.</p>	<p>Which statement <u>best</u> describes what a single cell needs to survive?</p> <p>Which type of organism has a collection of cells that work together to [biological function]?</p>

Science Tested Standards

Grade 5

Reporting Category: Life Science (continued)	
<p>Standards:</p> <p>5.10.3 Explain that in complex organisms such as humans, cells can have a very wide variety of forms and perform very different roles (e.g., nerve cells, muscle cells, and fat cells).</p> <p>5.11.1 Explain why there must be a reliable way to transfer information from one generation to the next in order for offspring to resemble their parents.</p> <p>5.11.2 List some characteristics of plants and animals that are fully inherited (e.g., form of flower, shape of leaves) and others that are affected by the climate or environmental conditions (e.g., browning of leaves from too much sun, language spoken).</p> <p>5.12.1 Explain that in any particular environment, some kinds of plants and animals survive well, some do not survive as well, and some cannot survive at all.</p> <p>5.12.2 Identify organisms that are not native to the Washington, DC, area and how they undergo changes to increase their chance of survival in the area.</p> <p>5.12.3 Explain how organisms can cause changes in their environment to ensure survival, and these changes may affect the ecosystem (the living and nonliving components of the environment).</p> <p>5.12.4 Explain that organisms fit enough to survive in a particular environment will typically produce offspring fit enough to survive and reproduce in that particular environment. Over time, these inherited characteristics are carried as the predominant forms (e.g., adaptations such as shape of beak, length of neck, shape of teeth).</p> <p>5.12.5 Explain how changes in an organism's habitat are sometimes beneficial and sometimes harmful, and how changes in the environment (drought, cold) have caused some plants and animals to die, migrate, or become extinct.</p>	<p>Assessment Stems:</p> <p>Which type of cell is responsible for [function]?</p> <p>Explain why the offspring of a/an [organism] resembles its parent.</p> <p>Which of these characteristics is least likely to be passed on to an [organism] from its parents?</p> <p>Which set of organisms is adapted to survive in [environment]?</p> <p>[Animal] can change color. Describe when this animal will most likely change color and why this is an advantage to the animal.</p> <p>A population of [animal] is growing so quickly that it eats most of the [food] in an area. Which of these statements explains how this may affect other organisms in the area?</p> <p>Which of these statements describes how traits are passed on to the offspring in a population that successfully survives in a changing environment?</p> <p>Which of these would probably have the greatest impact on the survival of an [animal] population living in an [area]?</p>

Science Tested Standards

Grade 5

Reporting Category: Life Science (continued)	
<p>Standards:</p> <p>5.12.6 Explain that many plants and animals can survive harsh environments because of seasonal behaviors (e.g., in winter, some trees shed leaves, some animals hibernate).</p> <p>5.12.7 Recognize that some animal behaviors are instinctive (e.g., turtles burying their eggs, human infants crying when hungry) and others learned (e.g., a wolf's hunting skills, humans' ability to build fires for warmth).</p> <p>5.12.8 Describe well-defined plant behaviors, such as the way seedlings' stems grow toward light and their roots grow downward in response to gravity.</p> <p>5.12.9 Examine the information that fossils provide us about living things that inhabited the Earth in the distant past, and describe how they can be compared both to one another and to living organisms according to their similarities and differences.</p> <p>5.12.10 Recognize and describe how artifacts and preserved remains provide some evidence of the physical characteristics and possible behaviors of human beings and their ancestors who lived long ago.</p>	<p>Assessment Stems:</p> <p>[Animal w/fur] lives in [description of that animal's environment]. Which of these behaviors allows [the animal] to survive in [the harsh conditions of the animal's environment]?</p> <p>Describe <u>one</u> instinctive behavior and <u>one</u> learned behavior for a/an [animal].</p> <p>Look at the [plant with specific behavior exhibited]. Which statement <u>best</u> describes the behavior of the plant?</p> <p>Look at the [fossil]. Which information can be learned about the organism by observing this fossil?</p> <p>What can scientists learn from remains/fossils of humans and animals that lived long ago?</p>

Science Tested Standards

Grade 8

Reporting Category: Scientific Thinking and Inquiry	
<p>Standards:</p> <p>8.1.1 Describe how scientific knowledge is subject to modification and refinement as new information challenges prevailing theories.</p> <p>8.1.2 Test hypotheses that pertain to the content under study.</p> <p>8.1.3 Restate or summarize accurately what others have said, asking for clarification or elaboration, and expressing alternative positions.</p> <p>8.1.4 Identify and criticize the reasoning in arguments in which fact and opinion are intermingled or the conclusions do not follow logically from the evidence given, an analogy is not apt, no mention is made of whether the control group is very much like the experimental group, or all members of a group are implied to have nearly identical characteristics that differ from those of other groups.</p> <p>8.2.1 Describe how if more than one variable changes at the same time in an experiment, the outcome of the experiment may not be attributable to a change in any single variable.</p> <p>8.2.2 Write clear step-by-step instructions (procedural summaries) for conducting investigations.</p> <p>8.2.3 Use tables, charts, and graphs in making arguments and claims in presentations about lab work.</p> <p>8.2.4 Read analog and digital meters on instruments used to make direct measurements of length, volume, weight, elapsed time, rates, or temperatures, and choose appropriate units. Explain how to interpolate on analog scales.</p> <p>8.2.5 Explain why arguments may be invalid if based on very small samples of data, biased samples, or experiments in which there was no control sample.</p>	<p>Assessment Stems:</p> <p>Which of these <u>best</u> describes what will happen to the [certain scientific theory] if new information is found that proves that [the current theory is somehow flawed]?</p> <p>Which hypothesis is [Name] most likely testing in this investigation?</p> <p>A group of students conducted an investigation about [subject]. The students concluded that [conclusion]. Which of these <u>accurately</u> restates the students' conclusion?</p> <p>A group of scientists published data from an investigation and claimed [statement of opinion]. (Insert data that appear to support the opinion.) Which of these identifies the <u>most</u> important reason fellow scientists may question the scientist's claim?</p> <p>Which of these best explains why there should only be one variable changed in an experiment?</p> <p>A student plans to investigate [hypothesis]. Describe <u>two</u> different steps the student must include in her investigation.</p> <p>This graph shows [data]. According to the graph, [question asking student to analyze data in the graph]?</p> <p>A student measured the temperature of three beakers of water left in different locations around the classroom. Which of these lists the <u>correct</u> temperature and units shown on each thermometer?</p> <p>Which of these <u>best</u> explains why the results of an investigation may be invalid when there is no control sample?</p>

Science Tested Standards

Grade 8

Reporting Category: Matter and Reactions	
<p>Standards:</p> <p>8.3.1 Explain that all matter is made up of atoms that are far too small to see directly through an optical microscope.</p> <p>8.3.2 Construct a model of an atom and know the atom is composed of protons, neutrons, and electrons.</p> <p>8.3.3 Explain that an object can be electrically charged either positively or negatively; objects with like charges repel each other, or objects with unlike charges attract each other.</p> <p>8.3.4 Know that density is mass per unit volume.</p> <p>8.3.5 Explain that equal volumes of different substances usually have different masses and, therefore, different densities.</p> <p>8.3.6 Determine the density of substances (regular and irregular solids, and liquids) from direct measurements of mass and volume, or of volume by water displacement.</p> <p>8.4.1 Using a periodic chart, explain that the atoms of any element are similar to each other, but they are different from atoms of other elements. Know that the atoms of a given isotope are identical to each other.</p> <p>8.4.2 Describe how elements can be classified, based on similar properties, into categories, including highly reactive metals, less reactive metals, highly reactive nonmetals, less reactive nonmetals, and some almost completely non-reactive (noble) gases.</p> <p>8.5.1 Diagram and describe how atoms may combine (bond) into molecules or into large crystalline arrays.</p> <p>8.5.2 Know that there are more than 100 elements that combine in a multitude of ways to produce compounds that make up all the living and nonliving things in the universe.</p>	<p>Assessment Stems:</p> <p>Which of these is the basic building block for all matter?</p> <p>An atom of [element] has [protons] and a charge of [charge]. How many electrons does an atom of [element] have?</p> <p>Which of these best explains why [object] repels [object]?</p> <p>Which of these measurements represents an object with the highest density?</p> <p>A student has equal volumes of [substance 1] and [substance 2]. Which statement about the mass and density of the two substances is <u>true</u>?</p> <p>An [irregular solid, regular solid] has a mass of [mass] and volume of [volume]. What is the density of the [substance]?</p> <p>Which of these describes a way that atoms of one element are different from atoms of another element?</p> <p>Which element is classified as a noble gas/highly reactive metal/nonmetal?</p> <p>Which diagram shows how the atoms of [molecule] bond?</p> <p>About how many elements have been discovered?</p>

Science Tested Standards

Grade 8

Reporting Category: Matter and Reactions (continued)	
<p>Standards:</p> <p>8.5.3 Understand how an ion is an atom or group of atoms (molecule) that has acquired an electric charge by losing or gaining one or more electrons.</p> <p>8.6.1 Describe how the atoms, molecules, or ions comprising an object are in constant individual motion, and explain how their average motional (kinetic) energy determines the temperature of the object, and how the strength of the forces between them determines the state of matter at that temperature.</p> <p>8.6.2 Explain that the melting and boiling temperatures of a substance (element or compound) depend on pressure and are independent of the amount of the sample. (Some materials do not melt and others do not boil because they decompose as the temperature is raised; other materials do not have a sharp melting point because they are not homogeneous.)</p> <p>8.7.1 Describe Law of Conservation of Matter, using the idea that when materials react with each other, many changes can take place, but that in every case the total amount of matter afterward is the same as before.</p> <p>8.7.2 Explain how the idea of atoms explains the conservation of matter: In chemical reactions, the number of atoms stays the same no matter how they are arranged, and the mass of atoms does not change significantly in chemical reactions, so their total mass stays the same.</p> <p>8.8.1 Explain how elements and compounds (reactants) react with each other to form products with different properties.</p> <p>8.8.2 Explain how during endothermic chemical reactions heat energy is absorbed from the surroundings, and in exothermic reactions heat energy is released to the surroundings.</p>	<p>Assessment Stems:</p> <p>An ion of [element] has a charge of [charge] and takes one electron from a neutral atom of [element]. Which of these shows the final charge on the [element] ion?</p> <p>In which of these substances are molecules <u>most</u> free to move around?</p> <p>Which of these explains why the boiling temperature of [substance] is different at high and low altitudes?</p> <p>Which of these <u>accurately</u> describes how the conservation of matter affects [chemical reaction]?</p> <p>Which of these best describes how the idea of atoms explains the conservation of matter?</p> <p>[Element/compound 1] is [property]. [Element/compound 2] is [property]. Describe the properties of [product of the reaction between element/compound 1 and element/compound 2] and explain why they are different from those of [element/compound 1] and [element/compound 2].</p> <p>Which of these types of reactions absorbs heat from/gives off heat to the surroundings?</p>

Science Tested Standards

Grade 8

Reporting Category: Matter and Reactions (continued)	
<p>Standards:</p> <p>8.8.3 Explain that reactions occur at different rates, slow to fast, and that reaction rates can be changed by changing the concentration of reactants, the temperature, the surface areas of solids, and by using catalyst.</p> <p>8.8.4 Recognize that solutions can be acidic, basic, or neutral, depending on the concentration of hydrogen ions in the solution. Understand that because this concentration can vary over a very large range, the logarithmic pH scale is used to describe how acidic or basic a solution is (each increase of one in the pH scale is an increase of 10 times in concentration).</p> <p>8.8.5 Recognize that indicators of chemical changes include temperature change, the production of gas, the production of a precipitate, or a color change.</p> <p>8.9.1 Explain that when an electric current flows there is always a magnetic field associated with it.</p> <p>8.9.2 Describe the role that electromagnets play in electric motors, electric generators, and simple devices such as doorbells and earphones.</p> <p>8.9.3 Explain how electrical circuits provide a means of transferring electrical energy from sources such as generators to devices in which heat, light, sound, and chemical changes are produced.</p>	<p>Assessment Stems:</p> <p>[Details about a chemical reaction] as shown in the equation below (<i>Equation.</i>) Which of these <u>best</u> describes what will happen if the temperature at which this reaction takes place is increased?</p> <p>(<i>Chart of pH values for various substances.</i>) [Substance] has a pH of about [value]. What acid in the chart would neutralize [substance] when both are used in equal volumes?</p> <p>Which of these proves that a chemical change has taken place?</p> <p>Which of these is always associated with a flowing electric current?</p> <p>Which of these <u>best</u> explains the reason electromagnets are used in doorbells?</p> <p>A circuit is shown in the diagram. (<i>Art of a circuit.</i>) Which part of the circuit provides the energy to the circuit?</p>
Reporting Category: Forces	
<p>8.10.1 Explain that every object exerts an attractive gravitational force on every other object.</p> <p>8.10.2 Demonstrate that the mass of an object is a measure of the quantity of matter it contains (measured in kg or g), and that its weight (measured in N) is the magnitude of the gravitational force exerted between Earth and that much mass.</p>	<p>Which statement explains why two objects in a vacuum are attracted to each other?</p> <p>How are the mass and the weight of an object different from each other?</p>

Science Tested Standards

Grade 8

Reporting Category: Forces (continued)	
<p>Standards:</p> <p>8.10.3 Determine and explain that the buoyant force on an object in a fluid is an upward force equal to the weight of the fluid the object has displaced; this principle can be used to predict whether an object will float or sink in a given fluid.</p> <p>8.11.1 Recognize that a force has both magnitude and direction.</p> <p>8.11.2 Observe and explain that when the forces on an object are balanced (equal and opposite forces that add up to zero), the motion of the object does not change.</p> <p>8.11.3 Explain why an unbalanced force acting on an object changes the object's speed or direction of motion or both.</p> <p>8.11.4 Know that the greater the mass of an object, the more force is needed to change its motion.</p> <p>8.11.5 Apply simple mathematical models to problems (e.g., formulas such as $F = ma$, $d = st$).</p> <p>8.11.6 Explain that if the net force acting on an object always acts toward the same center as the object moves, the object's path is a curve about the force center. (Motion in a circular orbit is the simplest example of this concept.)</p> <p>8.11.7 Plot and interpret distance versus time graphs for constant speed.</p>	<p>Assessment Stems:</p> <p>[Names] are investigating [material]. They measured the mass and volume of [two or more types of the material] and recorded their data in the table below. (Table.) The density of water is 1.0 gram per milliliter. If both [materials] are placed in water, which of these results will the students observe?</p> <p>What information is necessary to calculate the force acting on an object?</p> <p>An [object] is moving through space at a constant speed. If no outside force interacts with the [object], which of these is true about its motion?</p> <p>If two people are pushing in opposite directions on an object with an unequal force, how will the motion of the object change?</p> <p>A force is applied to an [object] that causes the [object] to move across the floor with a constant acceleration. Which of these describes the motion of an [object] with twice the mass of the first [object] if the same force is applied?</p> <p>The formula used to convert [change in units] is shown below. [equation] If the [physical property] is [value], what is the [physical property] in [different type of units]?</p> <p>Which of these correctly explains why a satellite's orbit is always around the center of Earth?</p> <p>Look at the table showing the motion of an [object]. (Table.) Which of these graphs correctly represents the motion of the object?</p>

Science Tested Standards

Grade 8

Reporting Category: Energy and Waves	
<p>Standards:</p> <p>8.12.1 Explain how energy is the ability to do work and is measured in joules (J).</p> <p>8.12.2 Describe kinetic energy as the energy of motion (e.g., a rolling ball), and potential energy as the energy of position or configuration (e.g., a raised object or a compressed spring).</p> <p>8.12.3 Recognize and describe that energy is a property of many systems and can take the forms of mechanical motion, gravitational energy, the energy of electrostatic and magnetostatic fields, sound, heat, and light (electromagnetic field energy).</p> <p>8.12.4 Describe that energy may be stored as potential energy in many ways, including chemical bonds and in the nucleus of atoms.</p> <p>8.12.5 Explain that the sun emits energy in the form of light and other radiation, and only a tiny fraction of that energy is intercepted by the Earth.</p> <p>8.12.6 Know that the sun's radiation consists of a wide range of wavelengths, mainly visible light, infrared, and ultraviolet radiation.</p> <p>8.13.1 Explain how a mechanical wave is a disturbance that propagates through a medium.</p> <p>8.13.2 Explain how electromagnetic waves differ from mechanical waves in that they do not need a medium for propagation; nevertheless, they can be described by many of the same quantities: amplitude, wavelength, frequency (or period), and wave speed.</p> <p>8.13.3 Recognize that human eyes respond to a narrow range of wavelengths of the electromagnetic spectrum (red through violet) called visible light.</p> <p>8.13.4 Summarize how something can be "seen" when light waves emitted or reflected by an object enter the eye, just as something can be "heard" when sound waves from an object enter the ear.</p>	<p>Assessment Stems:</p> <p>Which of these statements correctly describes the relationship between energy and work?</p> <p>Which of these <u>best</u> describes an example of kinetic energy/potential energy?</p> <p>A [device] converts electrical energy into which kinds of energy?</p> <p>Which of these does <u>not</u> describe potential energy?</p> <p>Which statement correctly compares the amount of the Sun's energy that reaches Earth with the amount of the energy that the Sun actually emits?</p> <p>[Name] is looking at the colors of light produced by sunlight passing through a glass prism. Which of these colors that [Name] sees has the longest wavelength?</p> <p>Which of these <u>best</u> describes a wave?</p> <p>Which of these do mechanical waves need in order to propagate?</p> <p>Which of these <u>best</u> describes the range of electromagnetic wavelengths that human eyes are able to see?</p> <p>Which of these <u>best</u> describes the process that occurs when sounds are heard by the ear?</p>

Science Tested Standards

Grade 8

Reporting Category: Energy and Waves (continued)	
<p>Standards:</p> <p>8.14.1 Observe and explain how waves carry energy from one place to another.</p> <p>8.14.2 Explain how sound in a fluid (e.g., air) is a longitudinal wave whose speed depends on the properties of the fluid in which it propagates.</p> <p>8.14.3 Explain how light waves, sound waves, and other waves move at different speeds in different materials.</p> <p>8.14.4 Demonstrate that vibrations in materials set up wave disturbances, such as sound and earthquake waves, which spread away from the source.</p> <p>8.14.5 Explain that waves obey the superposition principle: Many waves can pass through the same point at once, and the wave amplitude at that point is the sum of the amplitudes of the individual waves.</p> <p>8.15.1 Explain how kinetic energy can be transformed into potential energy and vice versa (e.g., in a bouncing ball).</p> <p>8.15.2 Explain that heat energy is a common product of an energy transformation, such as in biological growth, the operation of machines, the operation of a light bulb, and the motion of people.</p> <p>8.15.3 Explain how electrical energy can be generated using a variety of energy sources and can be transformed into almost any other form of energy, such as mechanical motion, light, sound, or heat.</p> <p>8.15.4 Compare and contrast how heat energy can be transferred through radiation, convection, or conduction.</p>	<p>Assessment Stems:</p> <p>Which of these <u>best</u> describes the movement of energy when a pebble is dropped into a puddle of water?</p> <p>Which type of wave is a sound wave?</p> <p>The table shows the difference in the speed of sound waves in [fluid substance] and [different fluid substance]. (Table.) Which of these <u>best</u> explains why sound moves at different speeds in these materials?</p> <p>A sound wave begins propagating from Point Y as shown in the diagram. (Diagram showing Point Y and 3 other labeled points at different distances from Point Y) Which point will the sound wave pass through last?</p> <p>If Wave 1 and Wave 2 both pass through point C at the same time, what will the amplitude of the combined wave be?</p> <p>Which of these correctly lists all of the energy transformations that occur when a spring is compressed and then released?</p> <p>Several students walk into a cold classroom. After several minutes, they feel as though the temperature in the room has increased. Which of these statements <u>best</u> describes why the room feels warmer to the students?</p> <p>Which of these is <u>not</u> used to generate electrical energy?</p> <p>Which of these <u>best</u> describes how energy is transferred when a pot of water is heated on a stove?</p>

<p>B.16.1 Using ecological studies, explain distinct relationships and differences between urban environments and other environmental systems.</p> <p>B.17.1 Illustrate and describe the cycles of biotic and abiotic factors (matter, nutrients, energy) in an ecosystem.</p> <p>B.17.2 Describe how factors in an ecosystem, such as the availability of energy, water, oxygen, and minerals, and the ability to recycle the residue of dead organic materials, cause fluctuations in population sizes.</p> <p>B.17.3 Explore and explain how changes in population size have an impact on the ecological balance of a community and how to analyze the effects.</p> <p>B.17.4 Describe how the physical or chemical environment may influence the rate, extent, and nature of the way organisms develop within ecosystems.</p> <p>B.18.1 Describe how ecosystems can be reasonably stable over hundreds or thousands of years.</p>	<p>The growth and development of cities can have many effects on the areas that surround them. Which of these is <u>least</u> likely to occur?</p> <p>Which of these is an <u>abiotic/biotic</u> factor in the [type of cycle]?</p> <p>Which of these environmental factors is <u>most</u> likely to cause an increase in the population size of [species]?</p> <p>[Information about an organism's relationship with other organisms in its environment] Which of these would <u>most</u> likely result due to the decline of the [organism]?</p> <p>[Species] has developed [physical adaptation or behavioral pattern based on physical environment]. This is most likely due to which of these environmental factors?</p> <p>Explain <u>two</u> factors that might threaten an ecosystem's stability.</p>

Reporting Category: Ecosystems (continued)	
<p>Standards:</p> <p>B.18.2 Explain that ecosystems tend to have cyclic fluctuations around a state of rough equilibrium, and change results from shifts in climate, natural causes, human activity, or when a new species or non-native species appears.</p> <p>B.19.1 Investigate and describe how point and nonpoint source pollution can affect the health of a bay’s watershed and wetlands.</p> <p>B.19.2 Assess the method for monitoring and safeguarding water quality, including local waterways such as the Anacostia and Potomac rivers, and know that macroinvertebrates can be early warning signs of decreasing water quality.</p>	<p>Assessment Stems:</p> <p>Certain laws in the United States prohibit the release of non-native species of [organism] because . . .</p> <p>Describe the difference between nonpoint source pollution and source pollution, and explain why one of these is more difficult to regulate.</p> <p>Which qualities of water can be monitored to assess water quality?</p>

Grade 5 Science: Sample Constructed-Response Item with Scoring Guide

A student placed several ice cubes into a plastic container. After sitting at room temperature for an hour, the ice melted into water.

- A** Describe the physical change that the ice went through. Write your answer on the lines in the answer booklet.
- B** What would need to happen to change the water back into ice? Write your answer on the lines in the answer booklet.

Item-Specific Rubric	Score Points	2
Key Elements: <hr/> The ice changed from solid to liquid. <hr/> Any reasonable description of cooling the water until it freezes. <hr/>		
Score Points: 2 points Two key elements 1 point One key element 0 points Other		

Sample Student Responses & Score Points Awarded

A The solid ice changed into a liquid.

B You could put it in the freezer until it turned back into ice.

Score: 2 points

A The ice changed into water.

B You would need to refreeze it.

Score: 1 point

Note: For Part A, no point awarded for a response of the ice changing into *water*, which is already stated in the item.

A The ice changed.

B You would need to undo it.

Score: 0 points

Note: No points awarded as the response to both parts are too vague.

Grade 8 Science: Sample Constructed-Response Item with Scoring Guide

A student has several objects made of different materials. The student wants to find the density of each object in order to predict which objects will float when placed into water.

- A** Which two properties should the student measure in order to find the density of each object? Write your answer on the line in the answer booklet.
- B** Explain how the student could use the density of each object to predict which objects will float when placed into water. Write your answer on the line in the answer booklet.

Item-Specific Rubric	Score Points	2
Key Elements: <hr/> Mass AND volume <hr/> Any reasonable explanation of comparing the density of each object to the density of water to see which objects have a lower density than water (1.0 g/mL). <hr/>		
Score Points: 2 points Two key elements 1 point One key element 0 points Other		

Sample Student Responses & Score Points Awarded

A Mass and volume

B You could see if an object's density was less than the density of water, then it would float.

Score: 2 points

Note: For Part B, students may state the 'density of water' or give the value of 1.0 g/mL.

A Mass

B If the object's density was less than water's, then it would float.

Score: 1 point

Note: No point awarded for just one property named in Part A.

A Weight and space

B A large density means the object won't float.

Score: 0 points

Note: No point awarded for Part A as the properties are incorrect, and no point awarded for Part B as there is no comparison to the density of water and/or the reasoning is incorrect.

Biology: Sample Constructed-Response Item with Scoring Guide

Many different substances can enter and exit a cell by passing through the cell membrane.

A Name the process by which oxygen molecules would enter through the cell membrane, and identify whether this process would require energy to occur. Write your answers in the chart provided in the answer booklet.

B Name the process by which sodium ions would exit through the cell membrane, and identify whether this process would require energy to occur. Write your answers in the chart provided in the answer booklet.

Item-Specific Rubric

Score Points

2

Key Elements:

Diffusion **AND** No (no energy required)

Active transport **AND** Yes (energy required)

Score Points:

2 points Two key elements

1 point One key element

0 points Other

Sample Student Responses & Score Points Awarded

	Process	Energy Required?
A	Diffusion	no
B	Active Transport	yes

Score: 2 points

	Process	Energy Required?
A	Diffusion	yes
B	Active Transport	yes

Score: 1 point

Note: Both parts must be correct for a student to earn a point for the specific process.

	Process	Energy Required?
A	Easy	no
B	Pumping	yes

Score: 0 points

Note: Neither process was named correctly, so the student did not earn a point for either process.

HEALTH AND PHYSICAL EDUCATION

Health and Physical Education Tested Standards

Grade 5

Reporting Category: Communication and Emotional Health
<p>Standards:</p> <p>5.1.1 Describe the relationship between physical health and emotional health.</p> <p>5.1.2 Describe the causes and symptoms of, and myths about, common mental and emotional illnesses.</p> <p>5.1.3 Understand that unkind words and gossip are a form of verbal violence, and work to stop unkind words and bullying.</p> <p>5.4.1 Describe how families and cultures have different norms for, and attach different meanings to, verbal and nonverbal communication (e.g., in their sense of personal space, use of touch, eye contact).</p> <p>5.4.3 Analyze how the media send mixed messages about alcohol, tobacco use, and violence.</p> <p>5.5.1 Apply attentive listening, feedback, and assertiveness skills (rather than passive or aggressive forms of communication) to enhance positive interpersonal communication.</p> <p>5.5.2 Demonstrate how to initiate and sustain conversation with another person by identifying oneself and discussing experiences, interests, and shared values.</p>
Reporting Category: Safety Skills
<p>5.1.4 Describe ways to prevent injuries in school and in the community.</p> <p>5.3.2 Describe and demonstrate simple first-aid procedures.</p> <p>5.3.3 Explain how to stay safe around weapons, including telling a trusted adult about the existence of a weapon at school.</p>
Reporting Category: Human Body and Personal Health
<p>5.1.5 Describe the basic structure and functions of the following human body systems: – the excretory system – the reproductive system – endocrine system.</p> <p>5.1.6 Describe how muscles and bones are interrelated.</p> <p>5.3.1 Describe and demonstrate strategies to improve or maintain personal health, including strategies for protecting eyes (e.g., sunglasses), ears (e.g., volume reduction), and skin (e.g., sun protection).</p>
Reporting Category: Disease Prevention
<p>5.1.10 Describe how sanitation and waste disposal, and environmental controls help to prevent diseases and health conditions.</p> <p>5.1.7 Define STIs and HIV/AIDS; describe behaviors that put one at risk for HIV/AIDS, STIs, or unintended pregnancy; explain why abstinence is the most effective way to prevent disease or pregnancy.</p> <p>5.1.9 Explain that bacteria and viruses cause infectious diseases that lead to common illnesses, including sexually transmitted diseases.</p>

Health and Physical Education Tested Standards

Grade 5

Reporting Category: Nutrition
Standards: 5.1.11 Explain how nutrition affects personal health, academic achievement, fitness and performance, including the effects of malnutrition on brain functioning.
Reporting Category: Alcohol, Tobacco and Other Drugs
5.1.12 Define addiction to alcohol, tobacco, and other drugs; and explain that those who are addicted require assistance to stop addiction. 5.1.13 Describe various methods for addiction prevention, intervention, treatment and recovery.
Reporting Category: Health Decision Making
5.1.8 Discuss strategies to remain abstinent and resist pressures to become sexually active. 5.2.1 Identify characteristics of valid health products that are approved by trusted sources, such as the Food and Drug Administration, the Consumer Product Safety Commission, and Internet sites that often end in .gov or .org. 5.2.2 Compare generic and brand name products for cost and validity. 5.4.2 Identify ways children can model healthful behaviors for family members. 5.6.1 Use health data to set achievable and purposeful short-term and long-term health goals that address strengths, needs, and health risks; and track progress toward achieving their achievement.
Reporting Category: Physical Education
PE 5.4.1 Explain why some people have more body fat than others. PE 5.4.2 Name and locate major muscles of the body. PE 5.4.3 Describe the principles of training and the application to each of the components of health-related physical fitness. PE 5.4.4 Explain why dehydration impairs temperature regulation and physical and mental performance. PE 5.4.5 Explain why body weight is maintained when calorie intake is equal to the calories expended. PE 5.4.7 Describe and demonstrate how to relieve a muscle cramp. PE 5.4.8 Explain the benefits of stretching after warm-up activities, and why it is safer to stretch a warm muscle than a cold muscle.

Health and Physical Education Tested Standards

Grade 8

Reporting Category: Communication and Emotional Health
<p>Standards:</p> <p>8.1.1 Identify warning signs of depression.</p> <p>8.1.2 Recommend ways for a friend or family member to deal with emotional conflicts or problems.</p> <p>8.5.1 Demonstrate how to provide constructive criticism, including selecting the right time/place; focusing on things that can be changed; and providing advice that is positive, specific, and helpful.</p> <p>8.5.2 Compare the use of cooperative and competitive strategies to achieve a group goal, and recommend strategies to keep a group on target and free from conflict.</p>
Reporting Category: Safety Skills and Community Health
<p>8.1.3 Define healthcare disparities that exist in the community and analyze how poverty, race, class and gender have contributed to those disparities.</p> <p>8.3.1 Describe and demonstrate basic first-aid procedures.</p> <p>8.3.2 Demonstrate safety strategies for the care of babies and young children.</p> <p>8.3.3 Define common risk factors associated with teen dating violence (e.g., alcohol, drugs, lack of parental supervision).</p>
Reporting Category: Human Development and Sexuality
<p>8.1.4 Explain how heredity, physiological changes, environmental influences, and varying social experiences contribute to one's growth and development.</p> <p>8.1.5 Define sexual orientation, using correct terminology; and explain that as people grow and develop they may begin to feel romantically and/or sexually attracted to people of a different gender and/or to people of the same gender.</p> <p>8.1.6 Explain the importance of testing both partners for HIV and STIs before sexual behavior and the risks and precautions of birth delivery when HIV and STIs are present.</p> <p>8.1.7 Compare and contrast the theories about what determines sexual orientation, including genetics; prenatal, social, and cultural influences; psychological factors; and a combination of these.</p> <p>8.1.8 Describe why abstinence and contraception are important.</p> <p>8.1.9 Describe fertilization, embryonic development, and fetal development; and discuss prenatal practices that support a healthy pregnancy.</p> <p>8.1.10 Describe the physical and emotional changes that occur during each stage of pregnancy and the importance of regular prenatal care.</p>

Health and Physical Education Tested Standards

Grade 8

Reporting Category: Human Development and Sexuality (continued)
Standards: 8.4.1 Explain the family life cycle and what it means to be a parent in various cultures. 8.4.2 Recognize that raising a child is one of the most important functions of a family; and describe the consequences of teen parenting from the perspectives of the teen mother, teen father, and parents of the teens.
Reporting Category: Disease Prevention
8.1.11 Illustrate how pathogens, family history, and other risk factors are related to the cause or prevention of disease and other health problems, such as high blood pressure. 8.1.12 Describe how exposure to allergens and other environmental triggers can cause allergic reactions and asthma attacks. 8.1.13 Recognize that proper diet, exercise, rest, and avoidance of risk behaviors, such as smoking, drinking, and other substance use, contribute to the health of a pregnant woman and positively impact the development of the fetus.
Reporting Category: Nutrition
8.1.14 Discuss the short-term and long-term benefits and risks associated with nutritional choices, such as heart disease, high cholesterol, cancer and osteoporosis. 8.1.15 Differentiate between being overweight and being obese; and research and recommend healthy ways to lose, gain, or maintain weight.
Reporting Category: Alcohol, Tobacco and Other Drugs
8.1.16 Explain the relationship between injected drug use and diseases such as HIV/AIDS and hepatitis. 8.1.17 Explain the consequences of driving under the influence of alcohol and other drugs; and develop strategies to prevent drinking and driving in order to maintain personal, family and community health. 8.1.18 Discuss how the use of alcohol and other drugs impairs decision-making, increases the risk of violence, and places one at risk for sexual assault, pregnancy, and STIs.
Reporting Category: Health Information and Advocacy
8.2.1 Develop guidelines for the use of professional health services based on the type of care needed, the nature of the problem, and the kind of questions that need answering. 8.4.3 Specify ways adolescents can advocate for personal, family, and community health. 8.4.4 Describe the ways technology can affect personal health and health behaviors for better and for worse, such as through new, effective medicines, improved exercise equipment, and the availability and nutrient quality of food.

Health and Physical Education Tested Standards

Grade 8

Reporting Category: Health Information and Advocacy (continued)

Standards:

8.6.1 Demonstrate the ability to identify choices on a range of health issues that are consistent with one's own values, and do not involve risking one's own health or safety, other people's health or safety, or breaking the law.

Reporting Category: Physical Education

PE 8.4.1 Compile and analyze a log noting the food intake/calories consumed and energy expended through physical activity.

PE 8.4.4 Explain why a strong heart is able to return quickly to its resting rate after exertion.

PE 8.4.6 Explain progression, overload, and specificity as they relate to principles of conditioning.

PE 8.4.9 Explain the effects of nutrition and participation in physical activity on weight control, self-concept, and physical performance.

PE 8.4.10 Identify muscles being strengthened during the performance of particular physical activities.

PE 8.4.3 Describe the relationship between the heart, lungs, muscles, blood and oxygen during physical activity.

PE 8.4.5 Identify the body's normal reactions to moderate to vigorous physical activity; recognize that the body will adapt to increased workloads.

PE 8.4.8 Identify basic principles in weight/resistance training and safety practices and explain the role that weight bearing activities play in bone strength.

Health and Physical Education Tested Standards

High School

Reporting Category: Human Growth and Development
<p>Standards:</p> <p>L1.1.1 Compare the rate of physical, social, and emotional change during various life stages, and discuss ways to foster healthy growth.</p> <p>L1.1.3 Identify and recommend behaviors that enhance and support the optimal functioning of bodily systems, including the functions of the body's immune system.</p> <p>L1.1.4 Describe each human life stage and the significant developmental issues or concerns that affect each.</p> <p>L1.4.1 Identify the traits of a healthy family, including responsibility, communication, trust, loyalty, respect, commitment, love, affirmation, and self-reliance; and explain the ways family members depend on one another and can positively influence each other's health decisions.</p>
Reporting Category: Sexuality and Reproduction
<p>L1.1.5 Describe the benefits of abstinence as the most effective means of contraception; then describe short-term and long-term consequences of adolescent sexual activity.</p> <p>L1.1.7 Explain the importance of testing both partners for HIV and STIs before sexual behavior and the risks and precautions of birth delivery when HIV and STIs are present.</p> <p>L1.5.2 Explain the importance of mutual respect and communication as key elements to successful dating and setting limits in sexual relationships.</p>
Reporting Category: Disease Prevention and Treatment
<p>L1.1.8 Compare and contrast disease and health conditions occurring in adolescence and young adulthood with those occurring later in life, such as cancer, cardiovascular diseases, respiratory diseases, arthritis, osteoporosis, and Alzheimer's diseases; and explain how health decisions today might increase or reduce the risk of developing such ailments.</p> <p>L1.1.9 Describe the pathogenic, genetic, age, cultural, environmental, and behavioral factors that influence the degree of risk for contracting specific diseases.</p> <p>L1.1.10 Describe how to delay the onset of and reduce risks related to potential health problems throughout the life span (e.g., osteoporosis).</p>
Reporting Category: Nutrition
<p>L1.1.11 Analyze and evaluate current dietary recommendations, resources, and trends from a variety of sources.</p> <p>L1.1.12 Analyze how healthy and unhealthy eating patterns impact the functioning of the human body, including bone development and the healthy functioning of the immune system.</p>

Health and Physical Education Tested Standards

High School

Reporting Category: Alcohol, Tobacco and Other Drugs
<p>Standards:</p> <p>L1.1.13 Explain theories about dependency, such as genetic predisposition, gender-related predisposition, and multiple risk factors.</p> <p>L1.1.14 Research and analyze how public health policies and government regulations related to the sale, distribution and use of tobacco influence health promotion and disease prevention.</p> <p>L1.1.15 Research and analyze how public health policies and government regulations related to the sale, distribution and use of alcohol influence health promotion and disease prevention.</p>
Reporting Category: Safety Skills
<p>L1.3.1 Evaluate home-safety conditions (e.g., proper use of smoke detectors and fire extinguishers) and workplace conditions (e.g., eye protection, gloves, and hard hats) for perceived and actual risk of intentional and unintentional injuries; and apply injury prevention and management strategies.</p> <p>L1.3.2 Demonstrate the ability to understand and follow the rules of the road, obey traffic laws, and select a safe route of travel, by bike or walking.</p> <p>L1.3.3 Identify the signs of emotional and physical abuse and the available resources for help and support in the schools, the local community, law enforcement agencies, and faith-based groups.</p>
Reporting Category: Locate Health Information and Assistance
<p>L1.2.1 Identify trends in the health care delivery system (e.g., health insurance coverage among Americans).</p> <p>L1.2.2 Analyze the cost and accessibility of health care services, including those provided by the public health department, community health clinics, private health clinics, urgent care facilities, and hospital emergency rooms.</p> <p>L1.2.3 Describe the basic criteria for eligibility in public health programs including School Lunch, Food Stamps, WIC (Women, Infants and Children), the Children's Health Insurance Program (CHIP), Medicaid, and Medicare.</p> <p>L1.4.2 Describe the role of government agencies in regulating advertising claims related to health that appears in the media and on the Internet.</p> <p>L1.6.2 Explain the importance of establishing a long-term relationship with a primary care provider as a critical component in maintaining one's health.</p>

Health and Physical Education Tested Standards

High School

Reporting Category: Physical Education

Standards:

PE.L1.2.1 Participate in moderate to vigorous physical activity at least four days each week that develops and maintains the five components of physical fitness.

PE.L1.2.2 Engage a variety of sustained, moderate to vigorous physical activities that enhance each component of health related fitness.

PE L1.2.3 Use physical fitness test results to set and adjust goals to improve fitness.

PE L1.2.4 Explain the role of physical activity in the prevention of disease and the reduction of health care costs.

PE.L1.2.5 Develop a four-week personal fitness plan specifying the proper warm-up and cool-down activities and the principles of exercise for each of the five components of health related physical fitness.

PE L1.2.6 Create a strength training program that includes the basic principles in weight/resistance training and safety practices.

PE.L1.2.7 Explain the inherent risks associated with physical activity in extreme environments.

PE L1.2.8 Explain the benefits that proper nutrition has on physical performance.

PE L1.2.9 Research and evaluate sport-specific conditioning programs.

Additional Resource Information and Glossary

In this section of the *DC CAS Resource Guide* is a list of additional resources identified by educators of the District of Columbia. These resources have been used in classrooms because of their curricular and assessment alignment to DC standards and Common Core State Standards.

Also included in this section is a glossary of assessment terms.

Additional Resources Page 130

Glossary

constructed response (CR)

a test item for which a student must write a response, usually to provide and then support an answer to a question OR to provide an answer and then show or explain a process for determining the answer

content standard

the skill and knowledge expected of students at a specific grade level

Performance-Level Descriptors (PLDs)

PLDs provide descriptions of students' performance at each achievement level. The PLDs for the DC CAS are included in the *Guide to Test Interpretation* distributed to schools.

rubric

a framework of criteria that defines how a student response, usually to a constructed-response item, will be evaluated and scored; a holistic, or generic, rubric gives criteria that are general in nature and can be used to score items of similar construct and content (e.g., reading comprehension items).

scoring guide

a guide that may include notes or sample responses that are specific to a constructed-response item; scoring guides are developed to help scorers as they apply scoring criteria to student responses.

selected response (SR)

a test item, also known as a multiple-choice item, in which a student is presented answer choices from which to select the correct response to a posed question or problem

strand

a cluster of standards within a content area that are often used as a reporting category, such as Informational Text or Number Sense and Operations
