

# Student Score Example

Timmy Scored 854

Little Timmy took the 2013 DC CAS and got a scaled score of 854. This scale score would be the same in all scenarios. In 2012 this would have made Timmy proficient. In 2013 this was more than the implemented cut scores and also resulted in Timmy being classified as proficient. However this is less than the unofficial alternate cut score for proficient and so would be considered basic under those cut scores.
