

The Special Education Data System (SEDS) is a comprehensive data system designed to support high quality, seamless service delivery for children with disabilities. SEDS is currently in its third year of implementation. OSSE has mandated its use by all LEAS to support the goal of optimizing the ability to improve service delivery and increase compliance related to the provision of a Free Appropriate Public Education (FAPE) to all students with disabilities in the District of Columbia. SEDS allows OSSE and LEA leaders to meet the following critical objectives:

- 1) Clarify, and make consistent, Individualized Education Program (IEP) development, management, and historical record keeping processes;
- 2) Improve service delivery by reducing the burden of paperwork and allowing staff to focus on delivering quality instruction and services to students with disabilities;
- 3) Support best practice in special education management by allowing for student and LEA-level reporting and ensuring accurate and reliable state and federal reporting;
- 4) Facilitate compliance and quality assurance through improved data accuracy, auditing, and timeline management; and
- 5) Support seamless transitions for students via an improved process for student special education records transfer between schools and LEAs.

### Accessing SEDS

Access for LEA staff: As all LEA databases are separate, each LEA has a unique web address to access SEDS. Click on the link next to an LEA name in order to access SEDS for that LEA. \*
